DOWNLOAD

Click on the link to download the player, it will take you to the Microsoft Store. Click on the button **Install** to proceed.

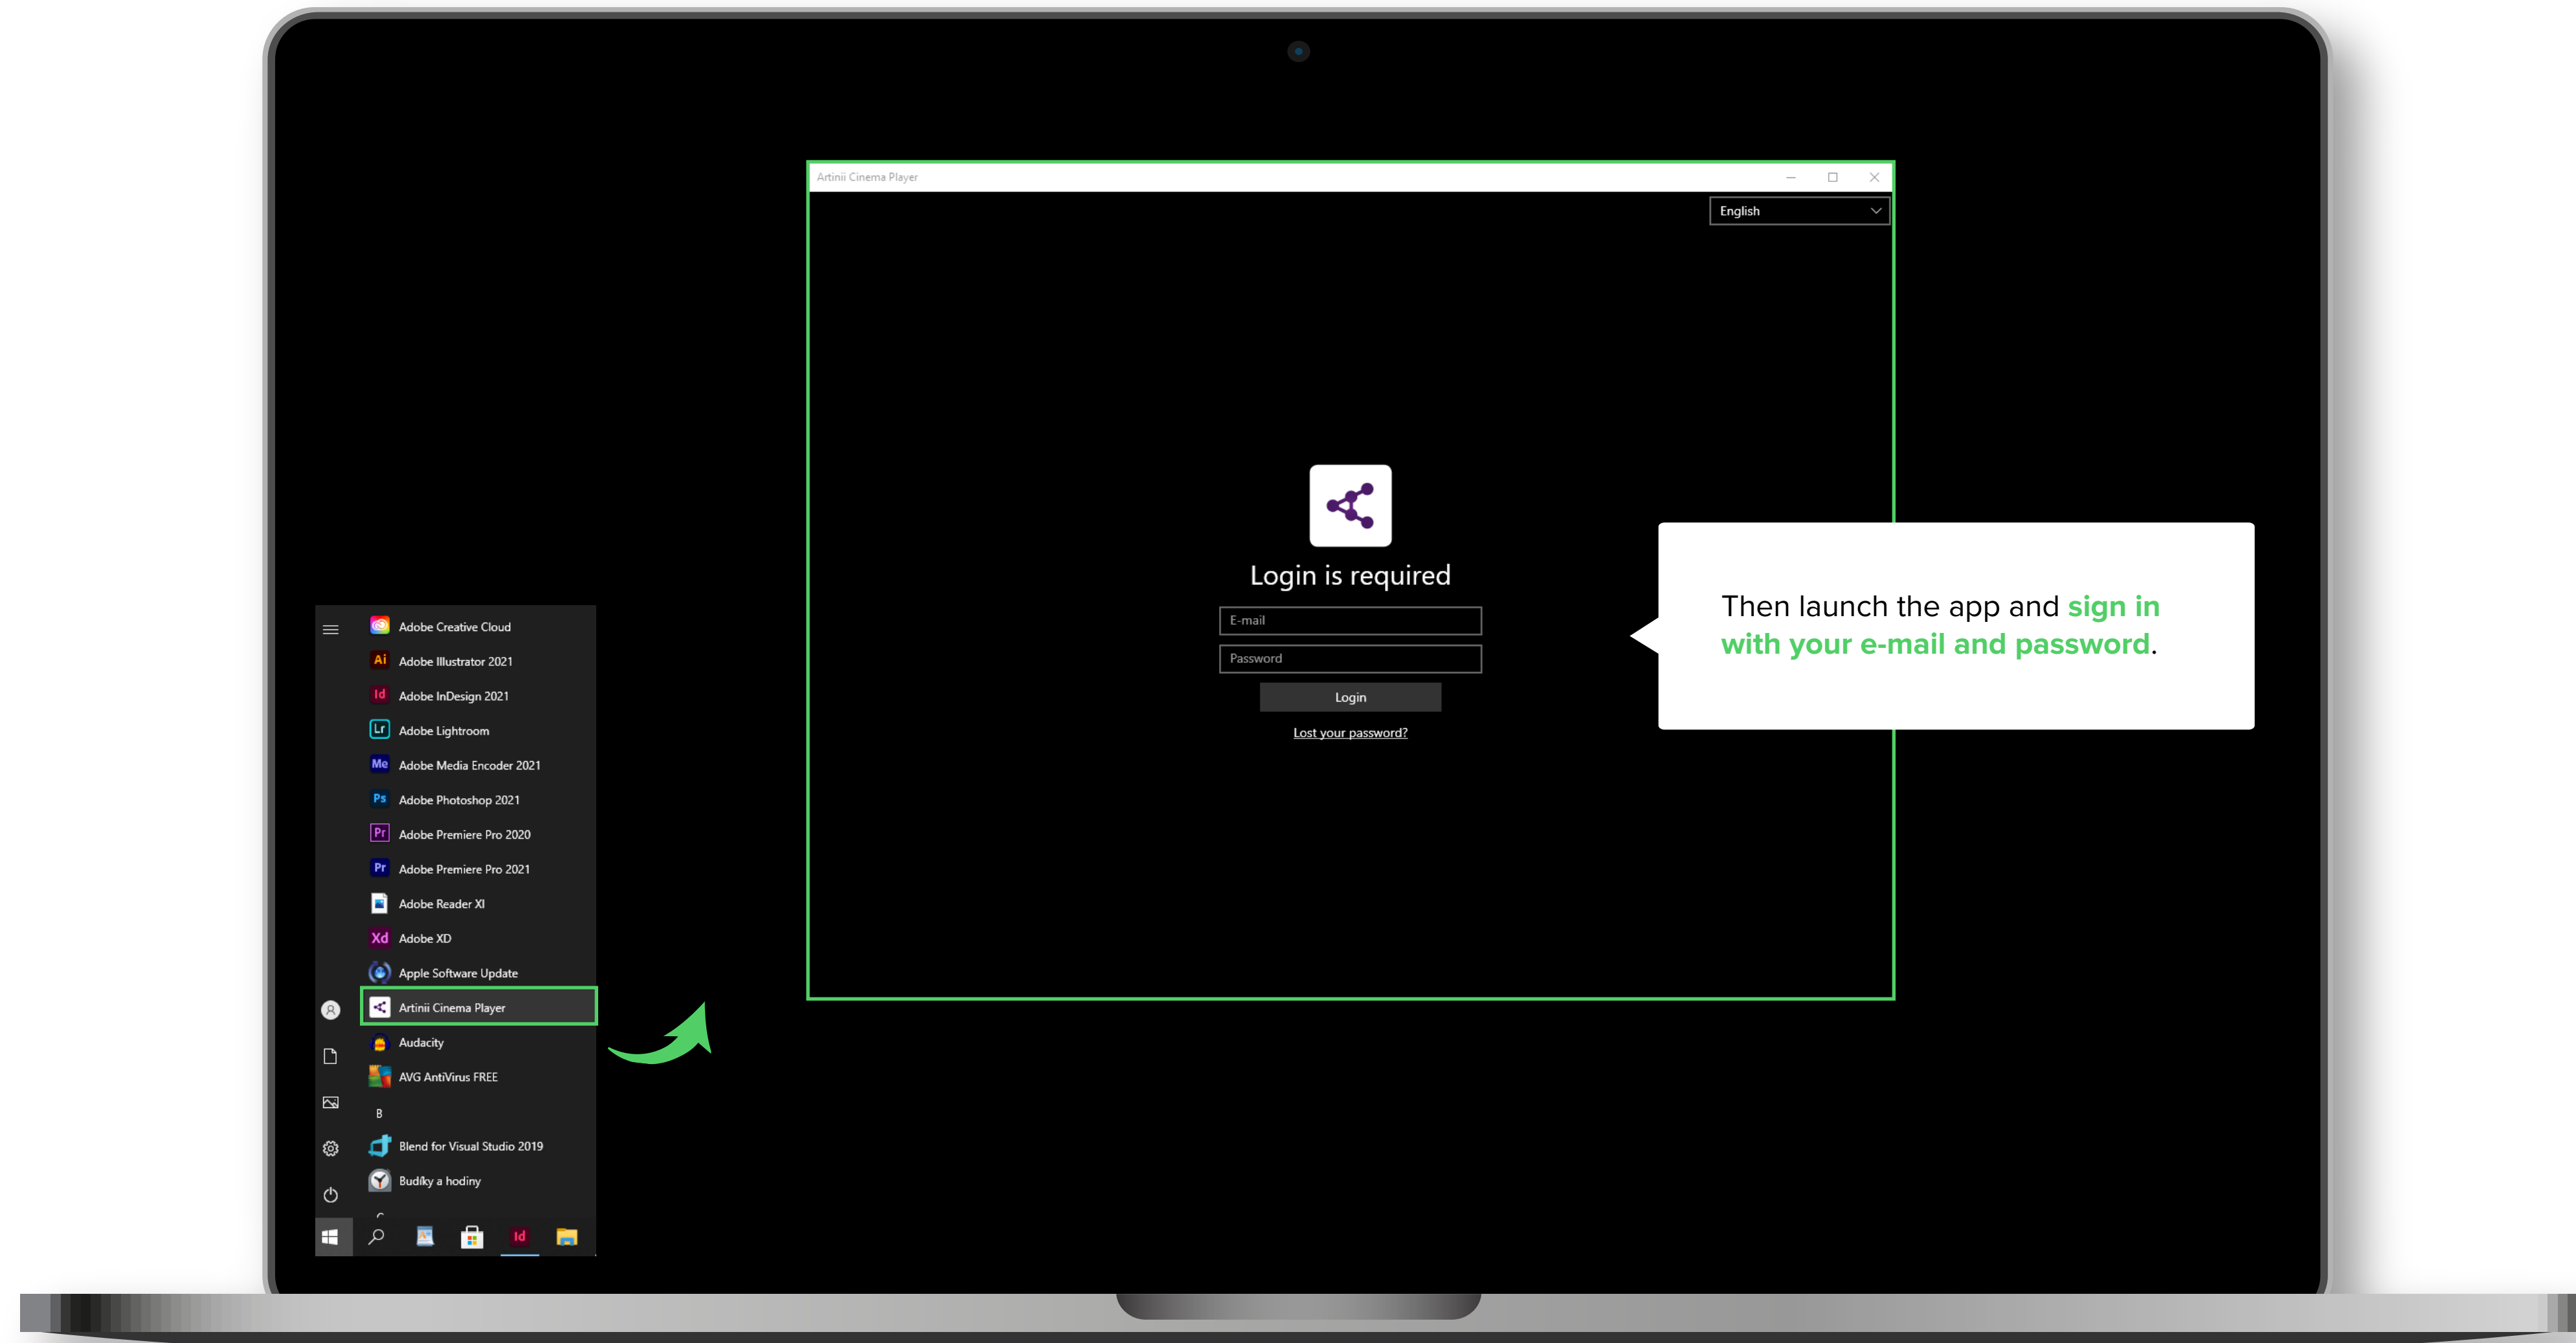

Links to download the player here.

Click on the **Download** button to download the player.

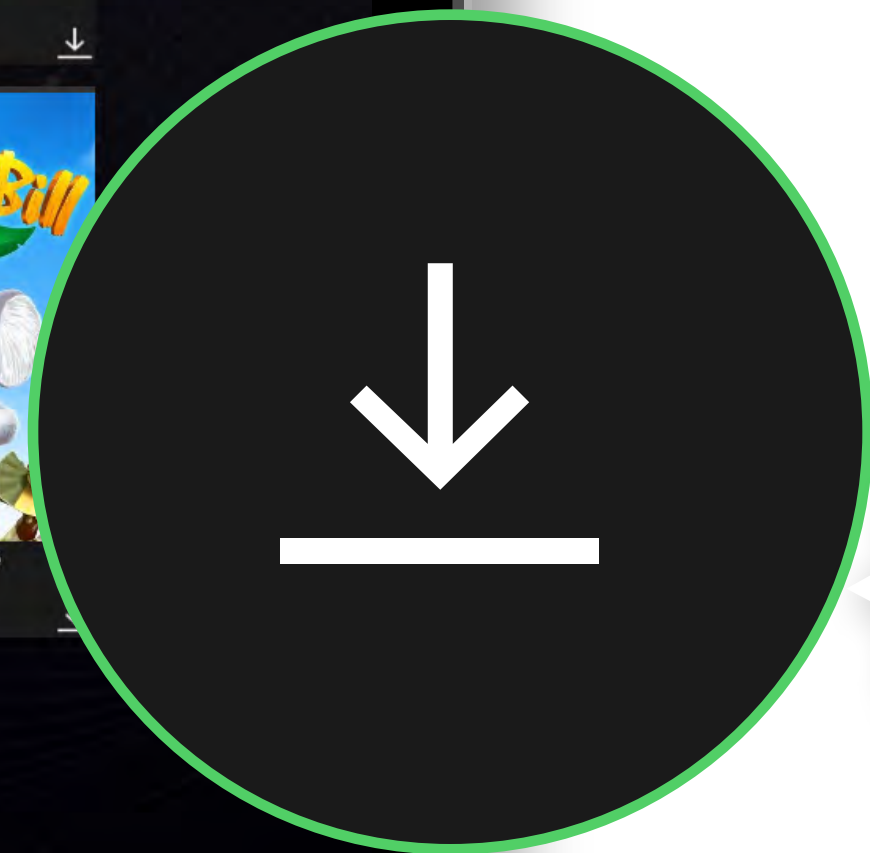

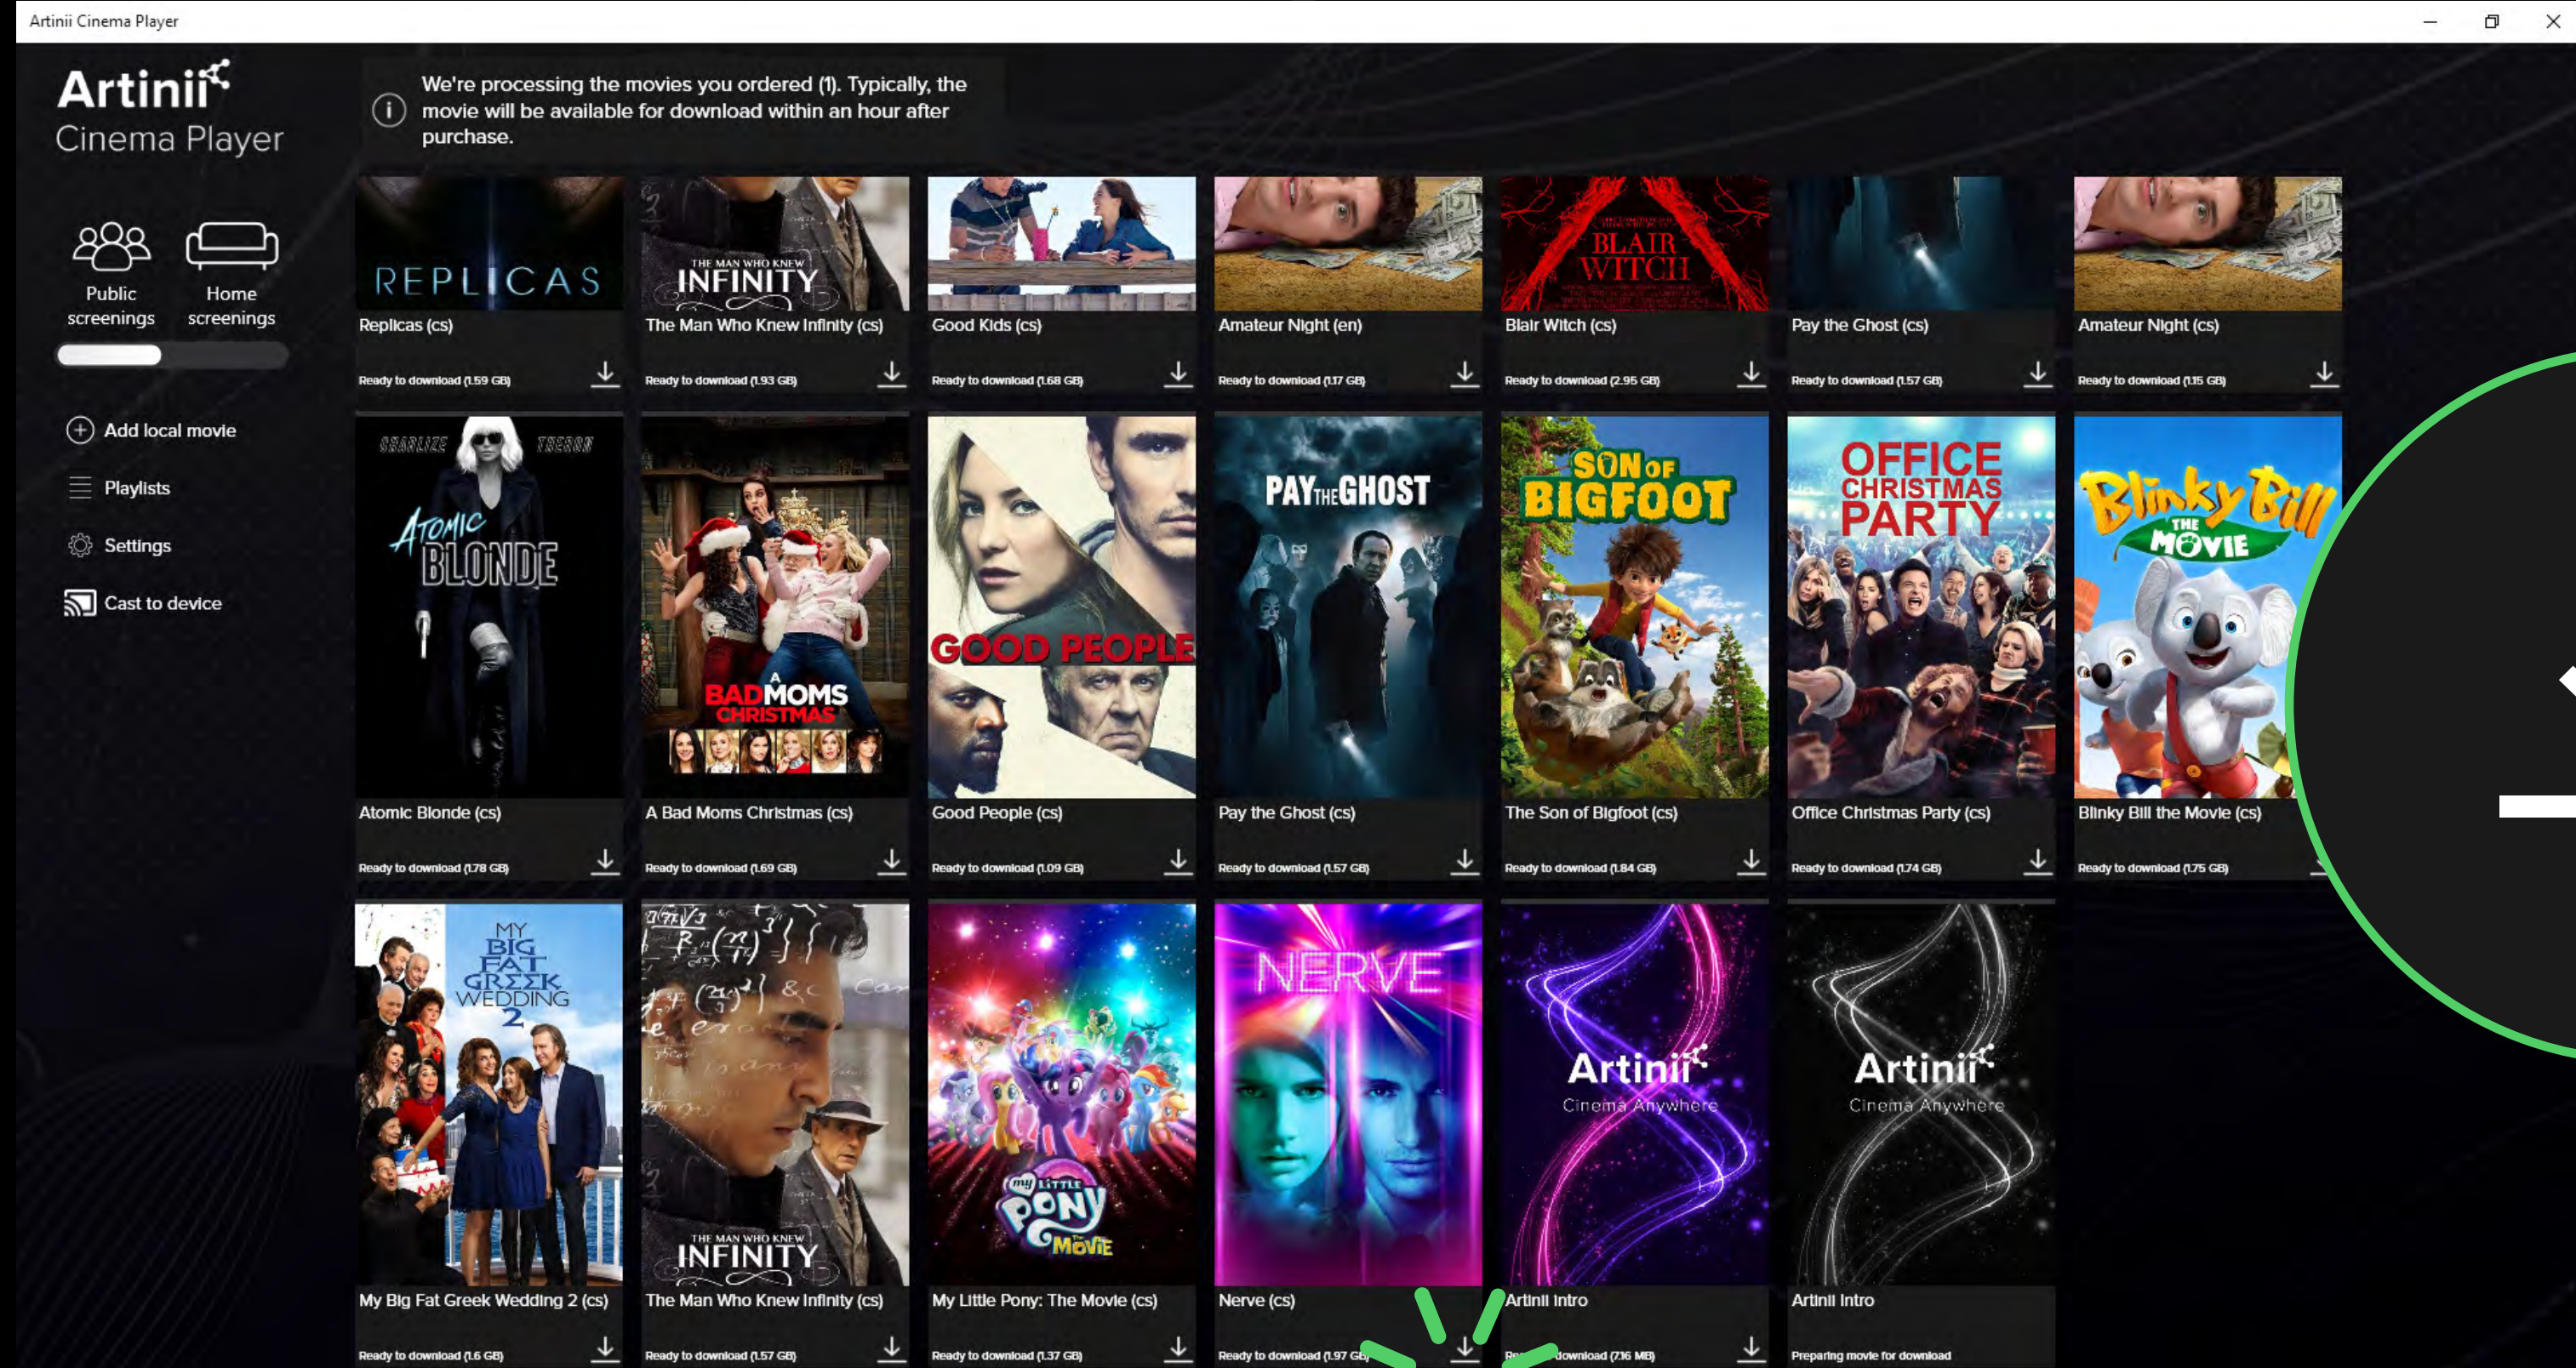

LOGIN

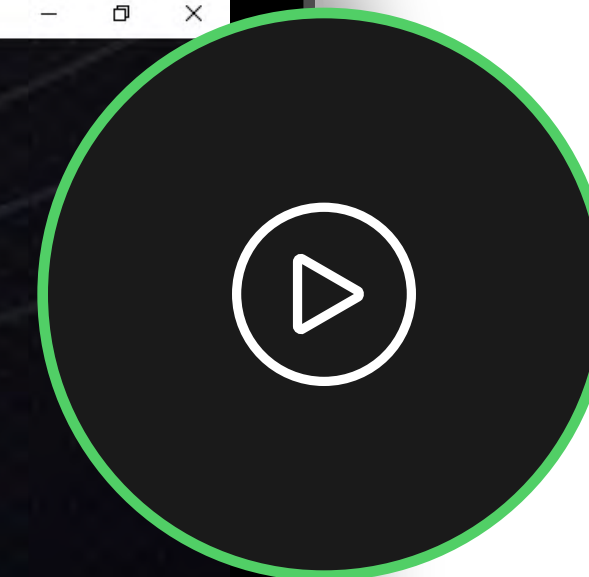

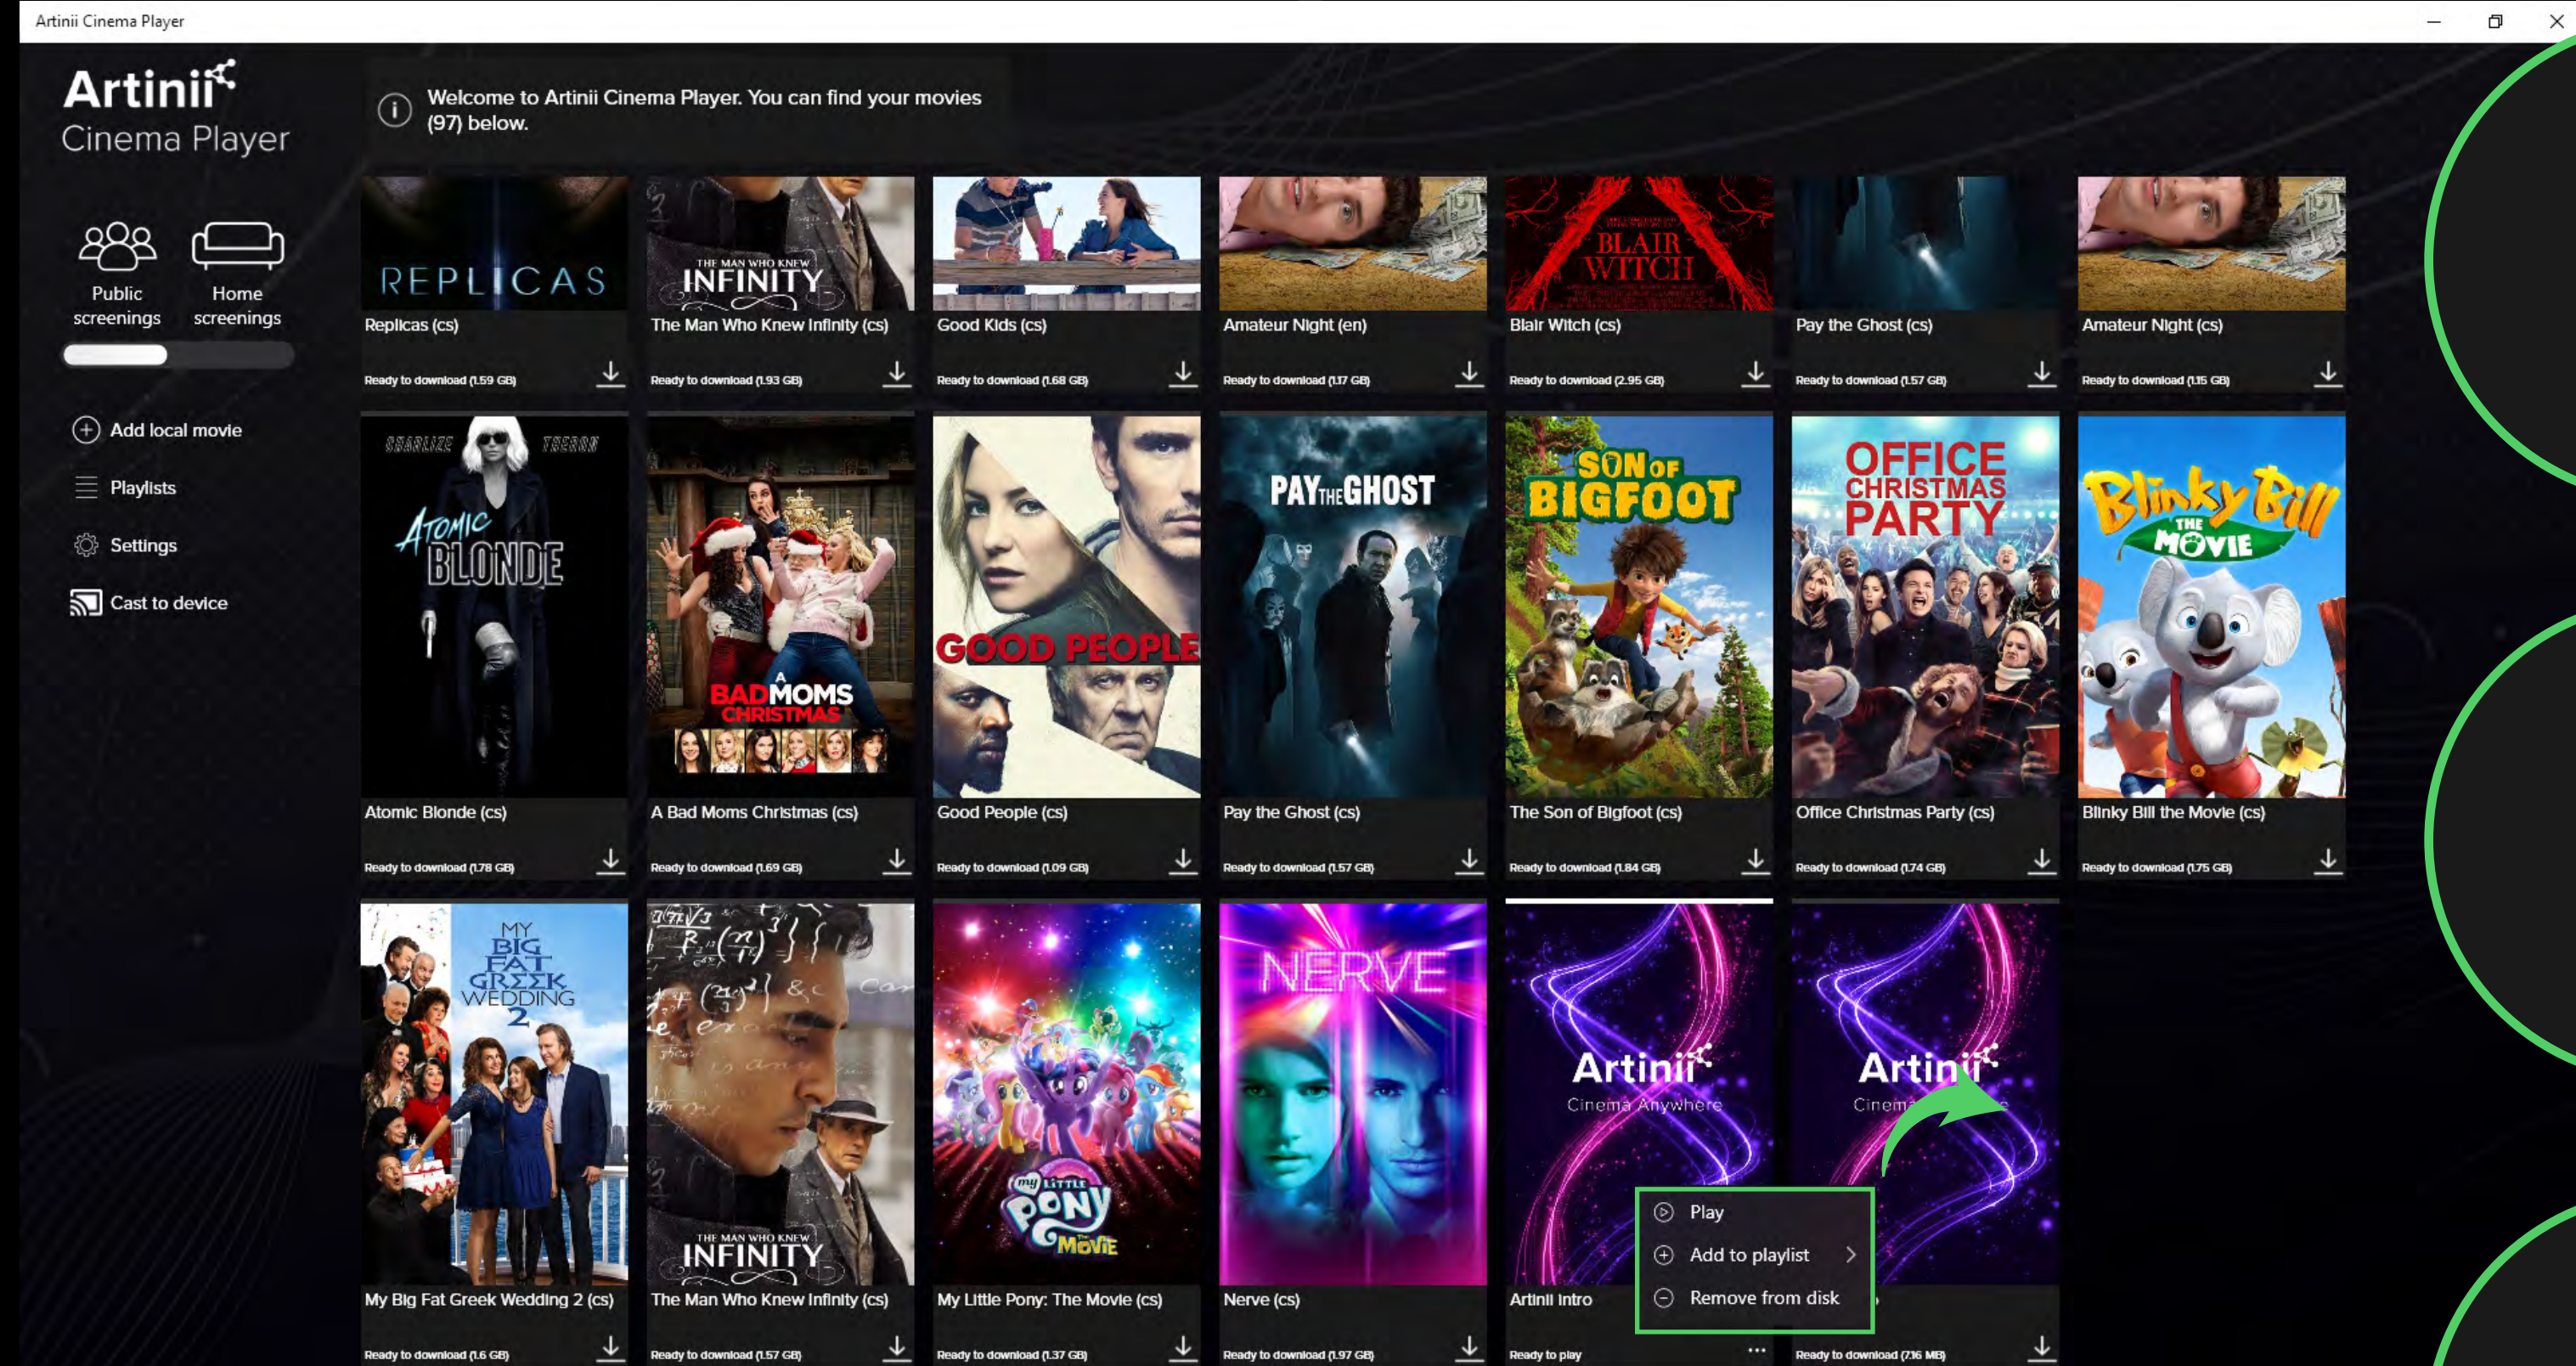

DOWNLOAD FILM

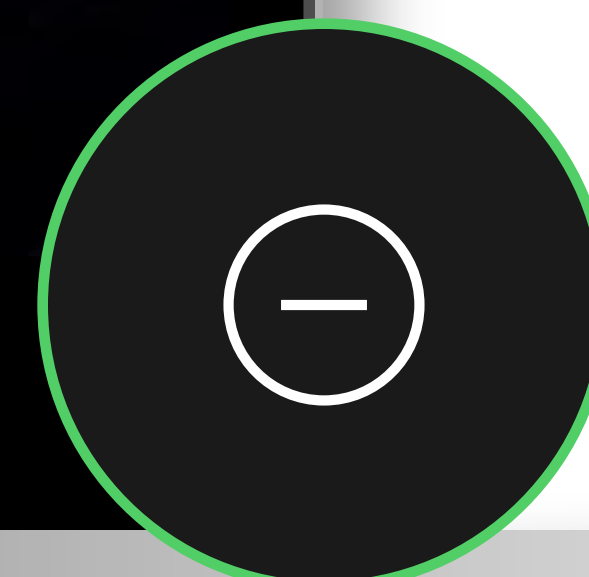

To download a film, [click on the arrow](#).

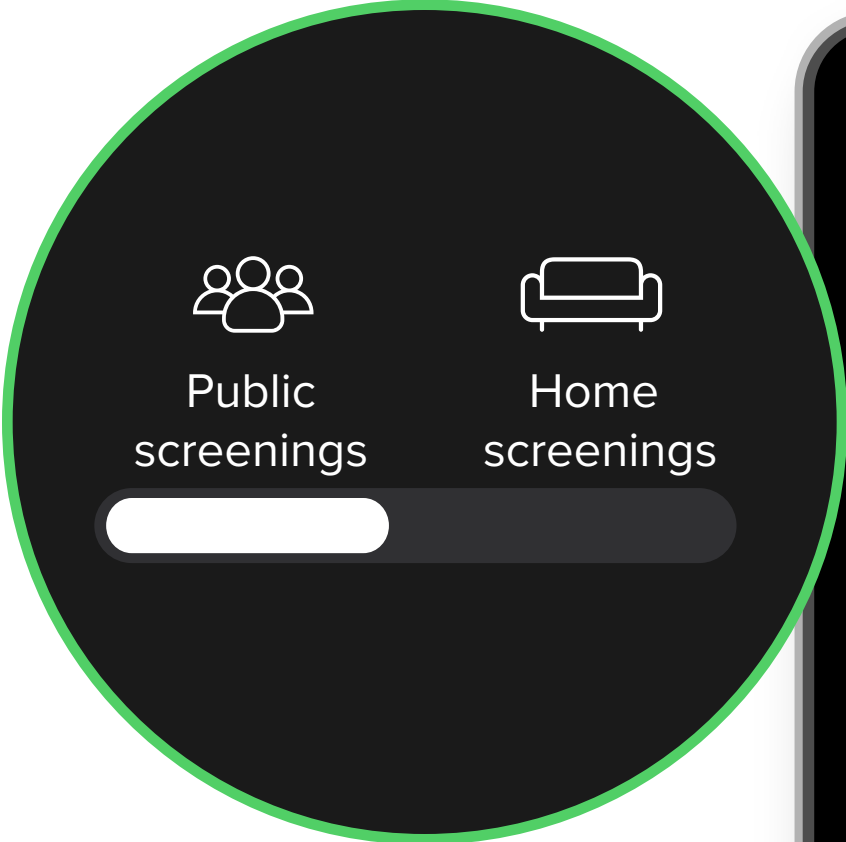

To turn on a film, **click on Play film.**

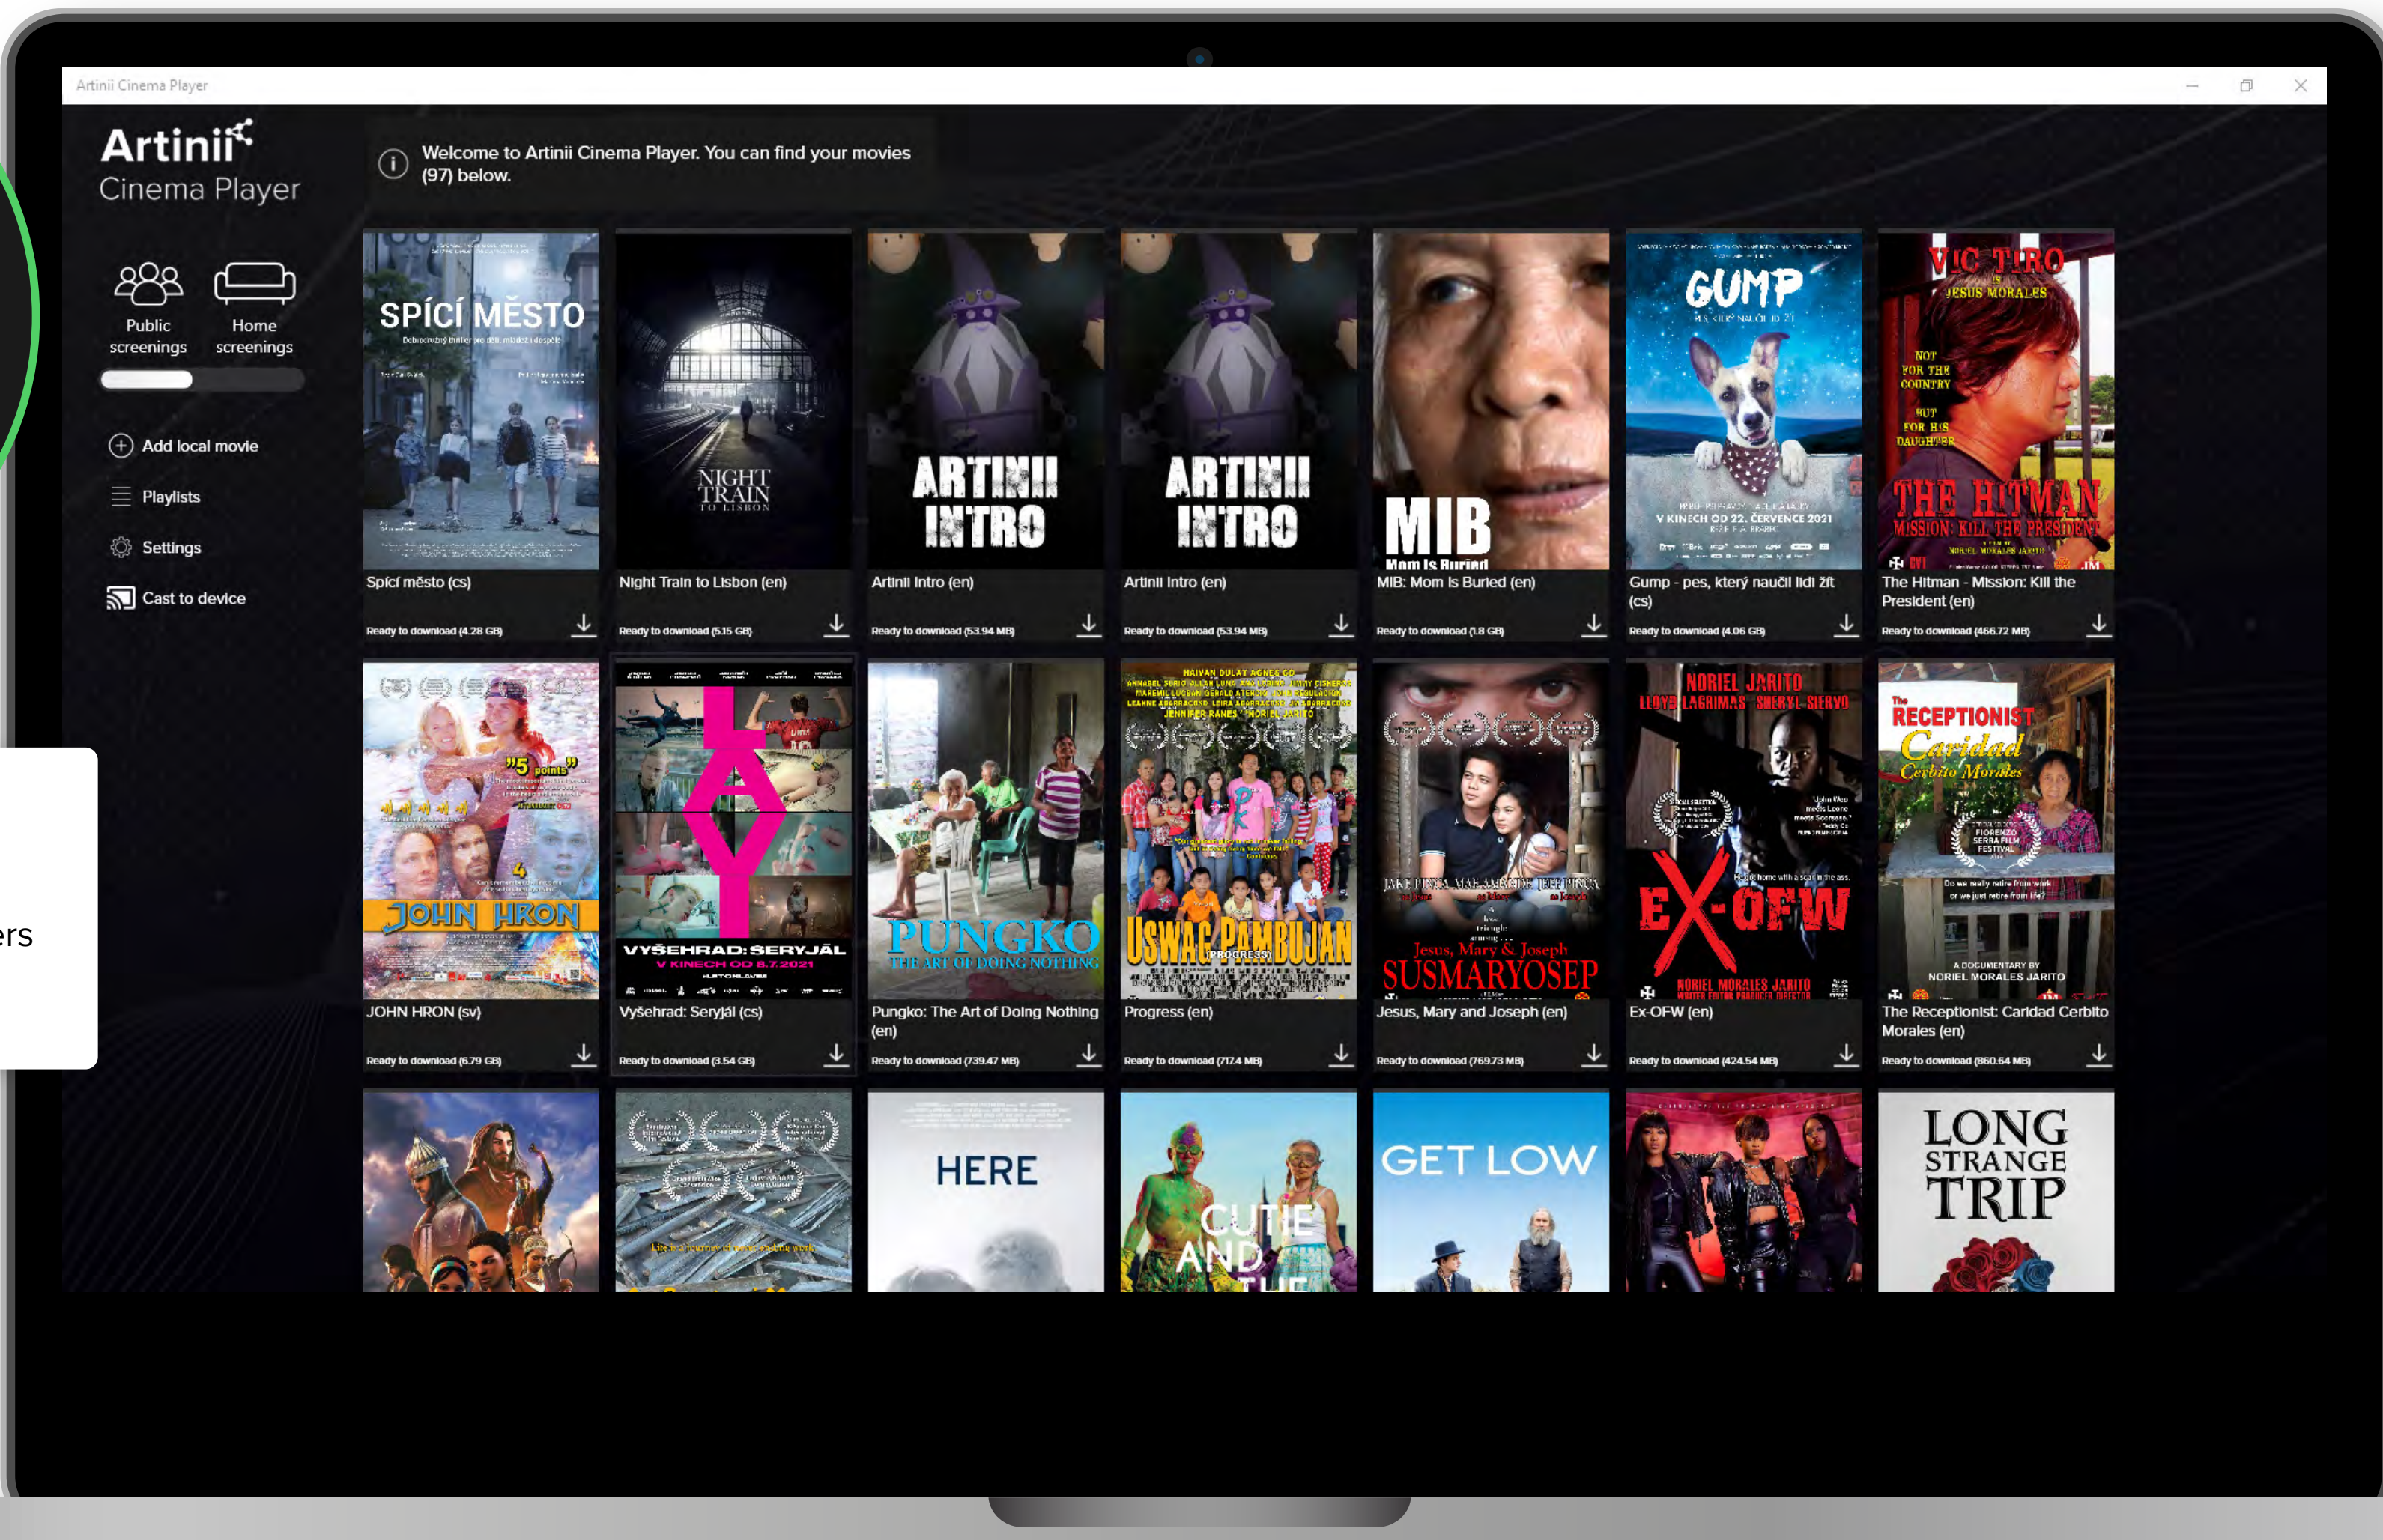

To add a film to a playlist, **click on Add to playlist.**

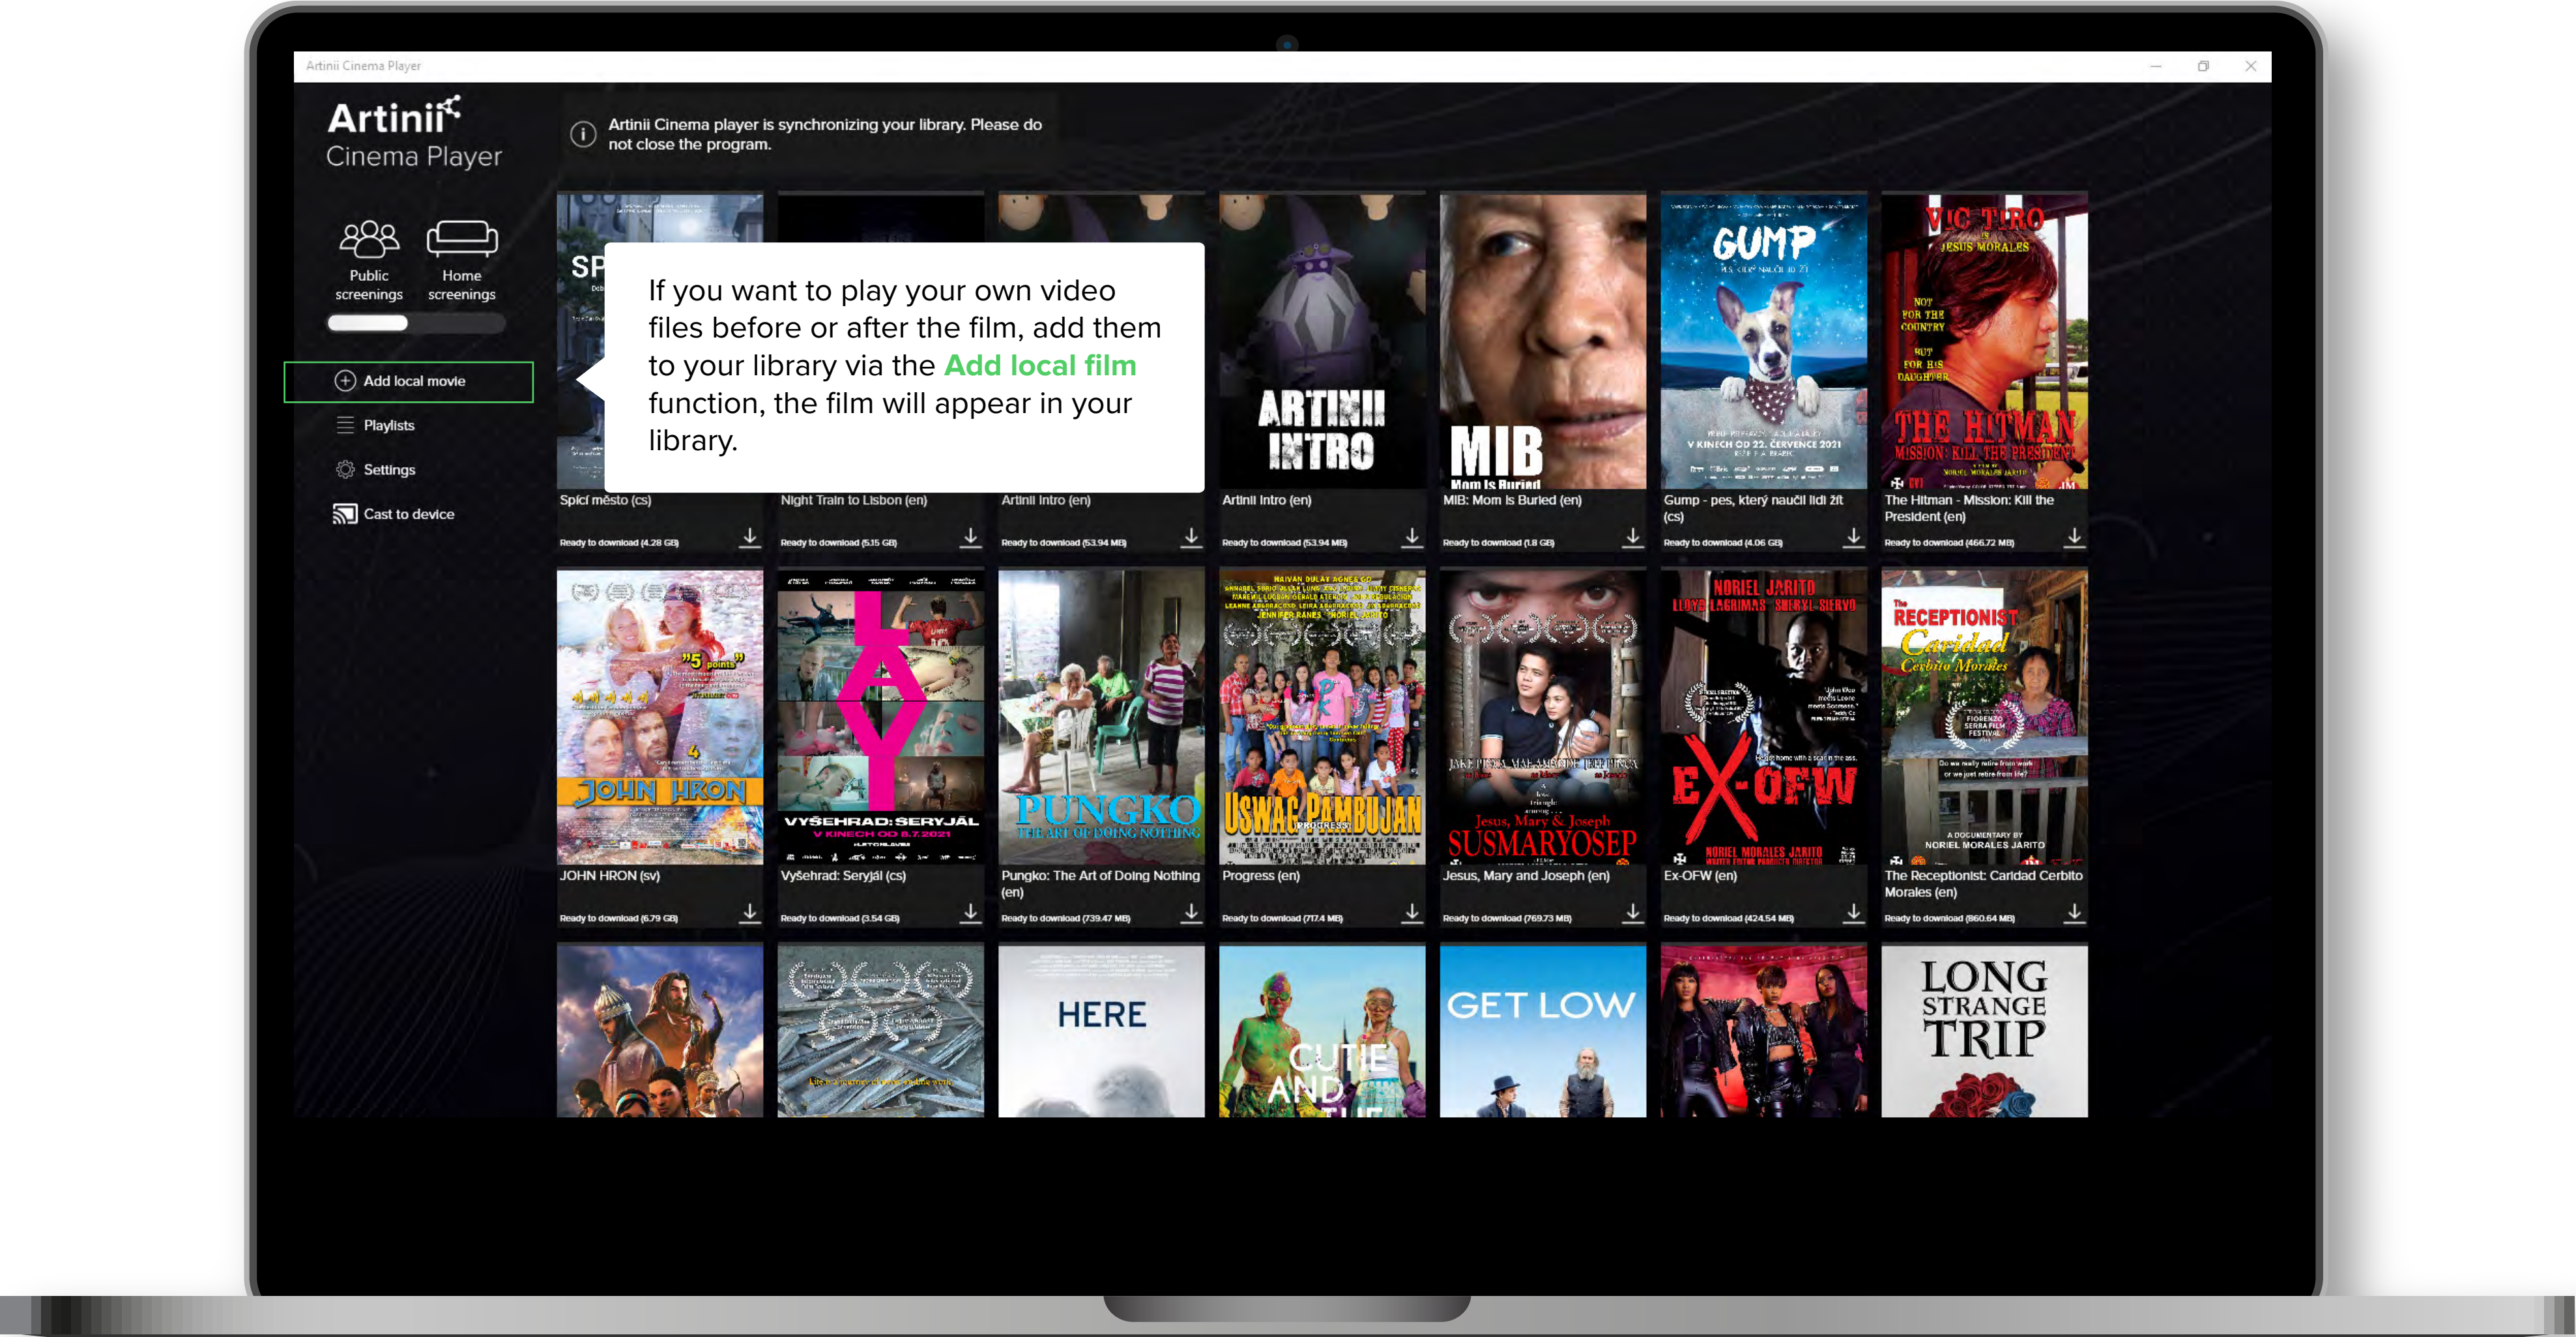

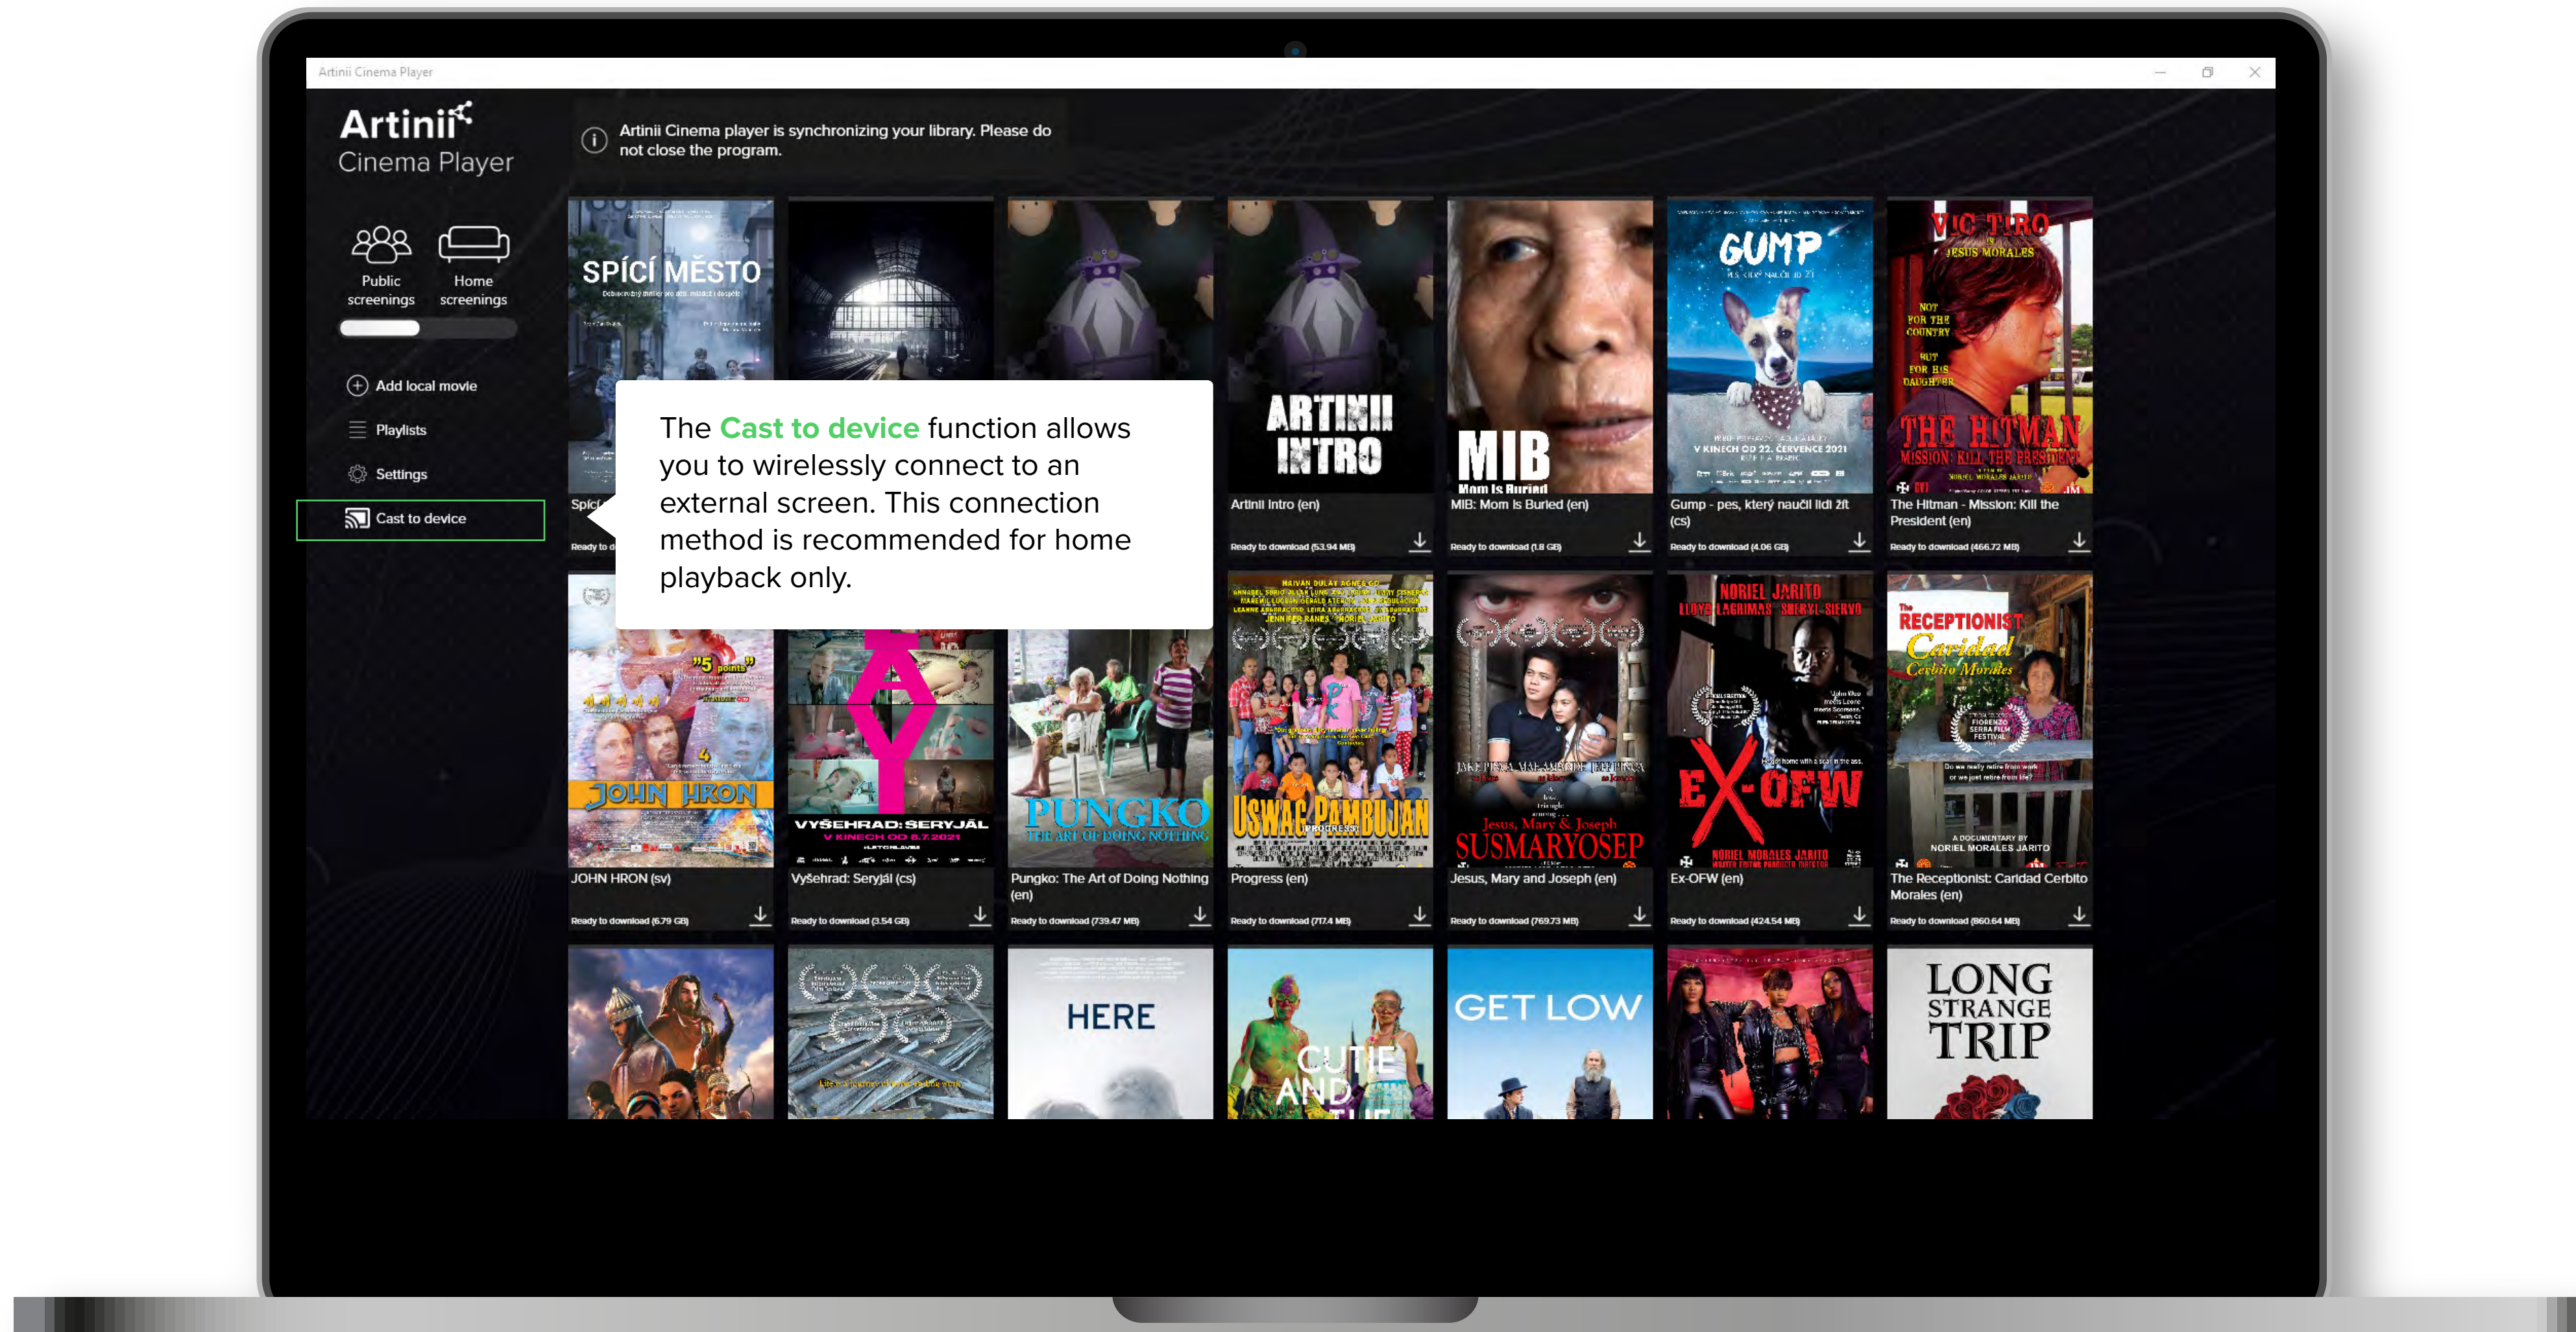

To delete a film from your PC, **click on Remove from disk.**

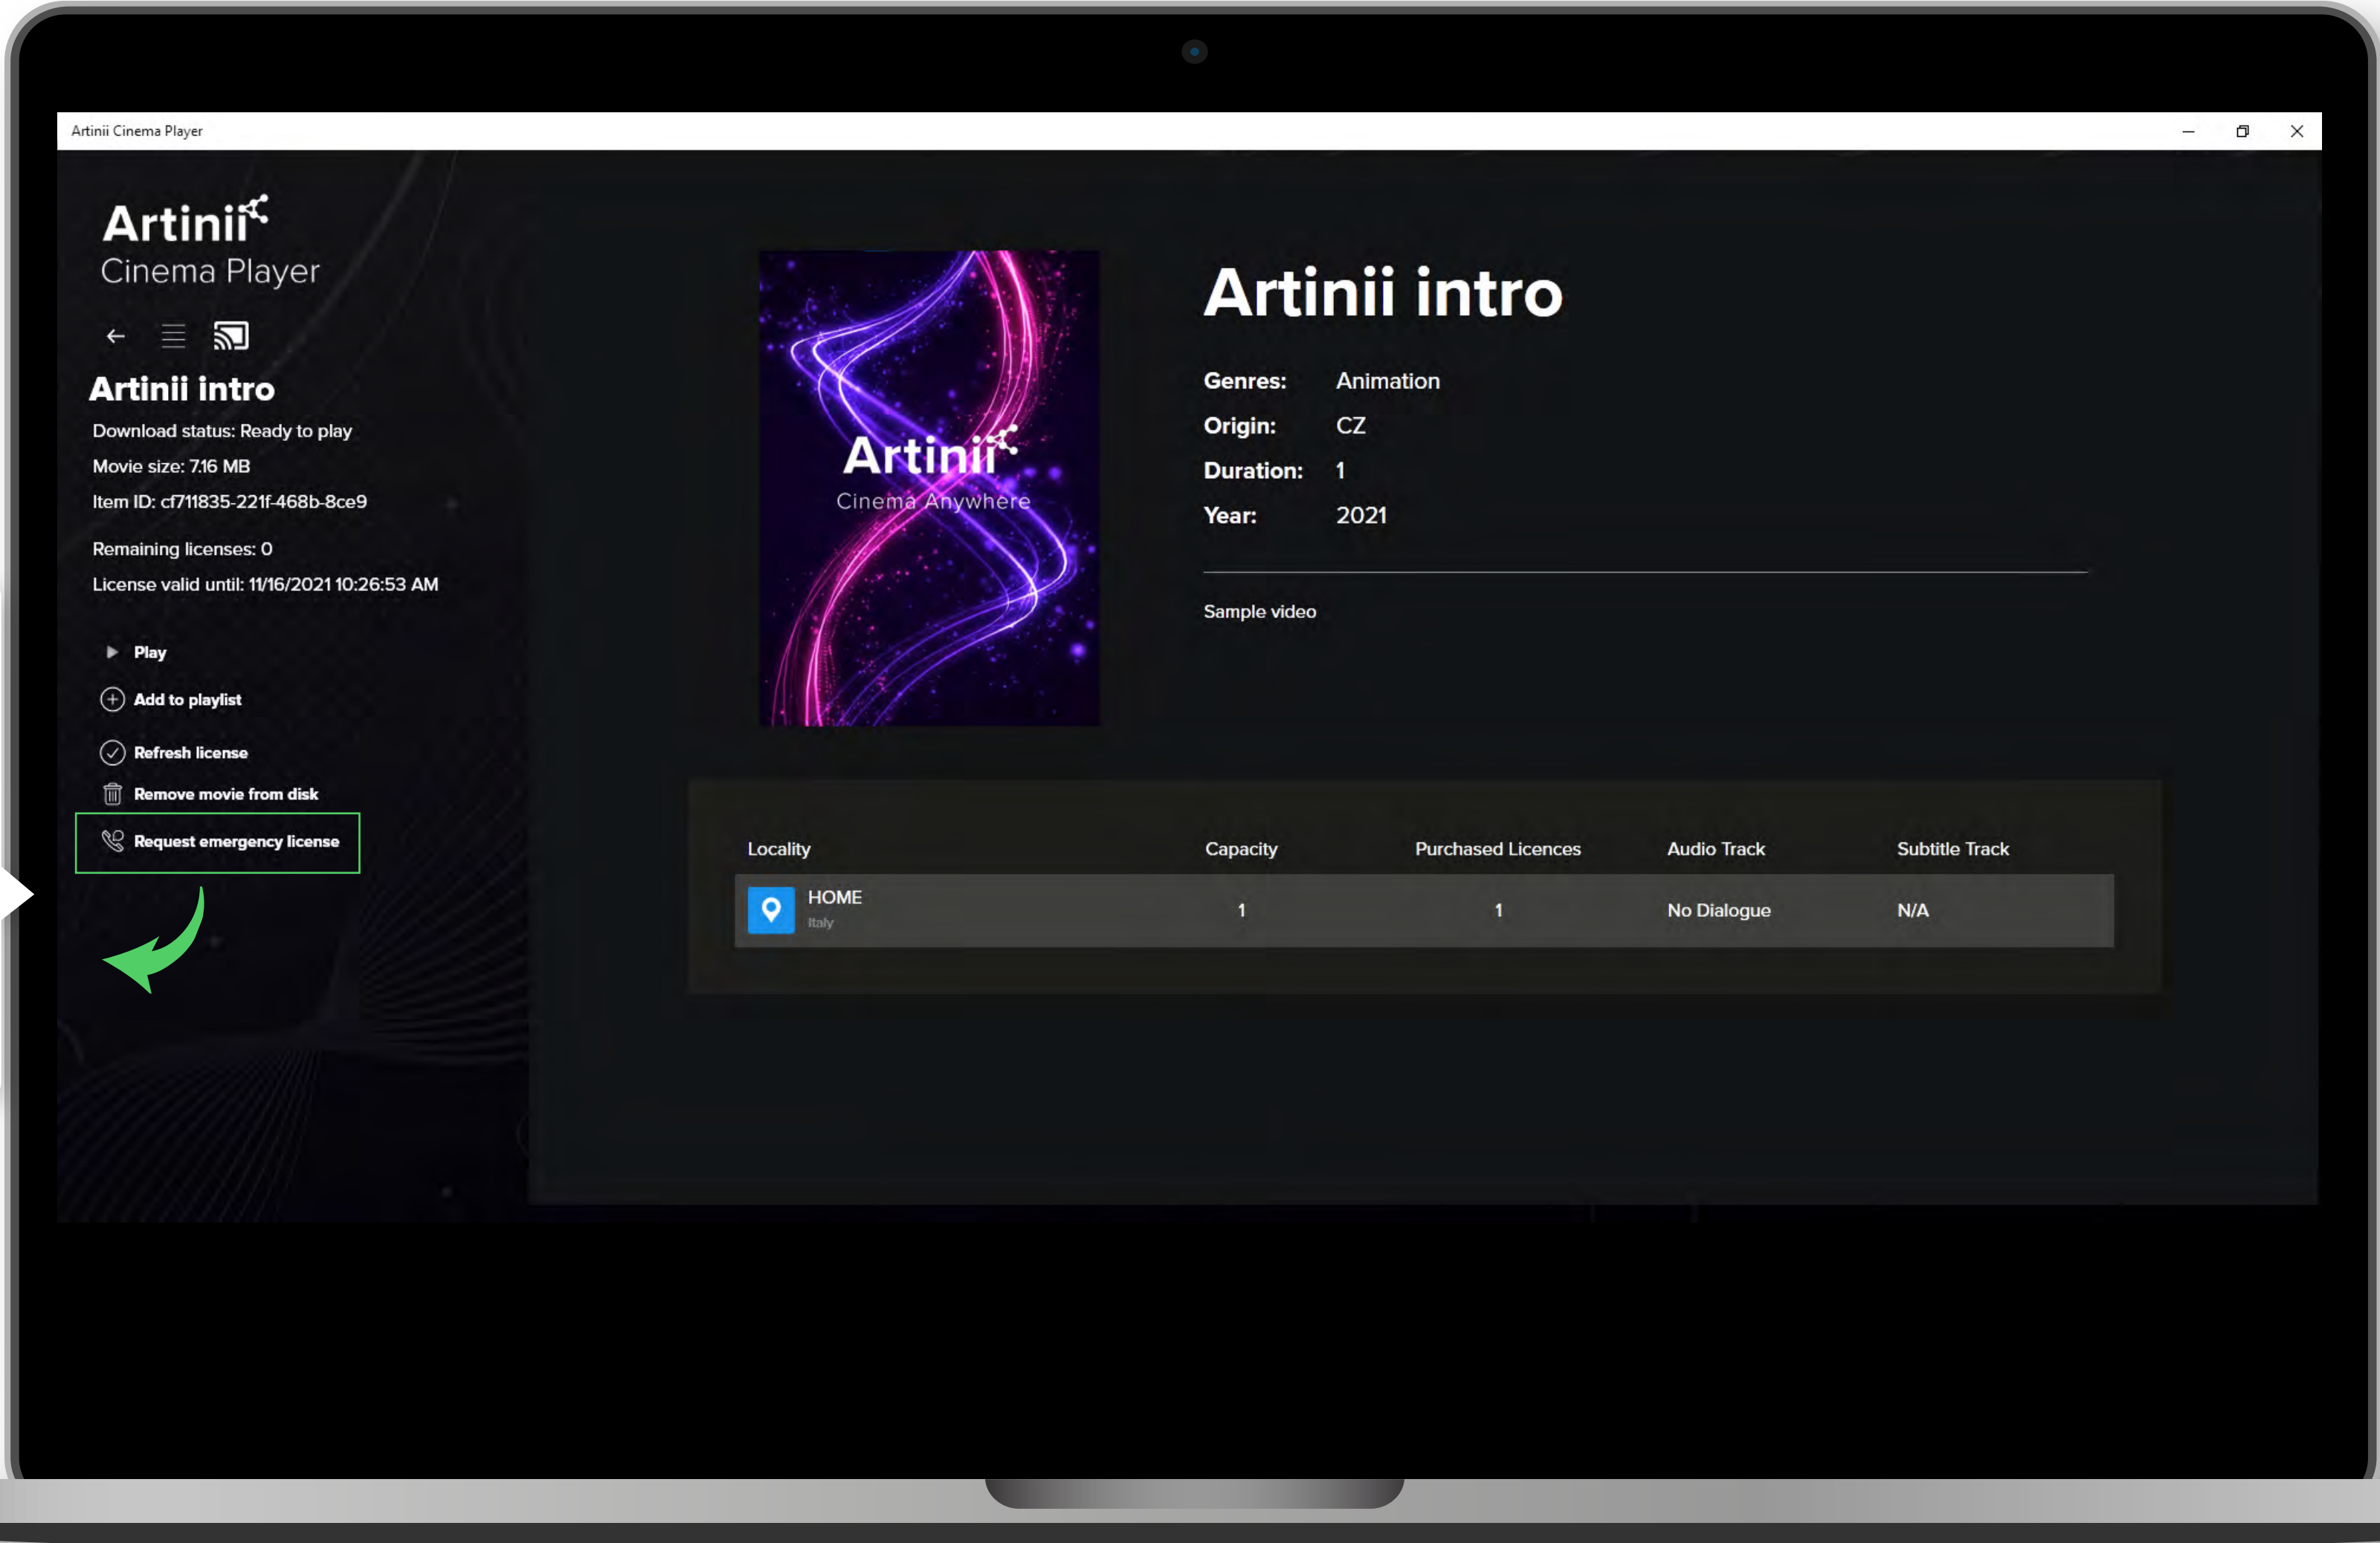

Have you purchased a film for a public screening?
You will find the film in the public screenings mode. You will see all orders for home screenings in the home screenings section.

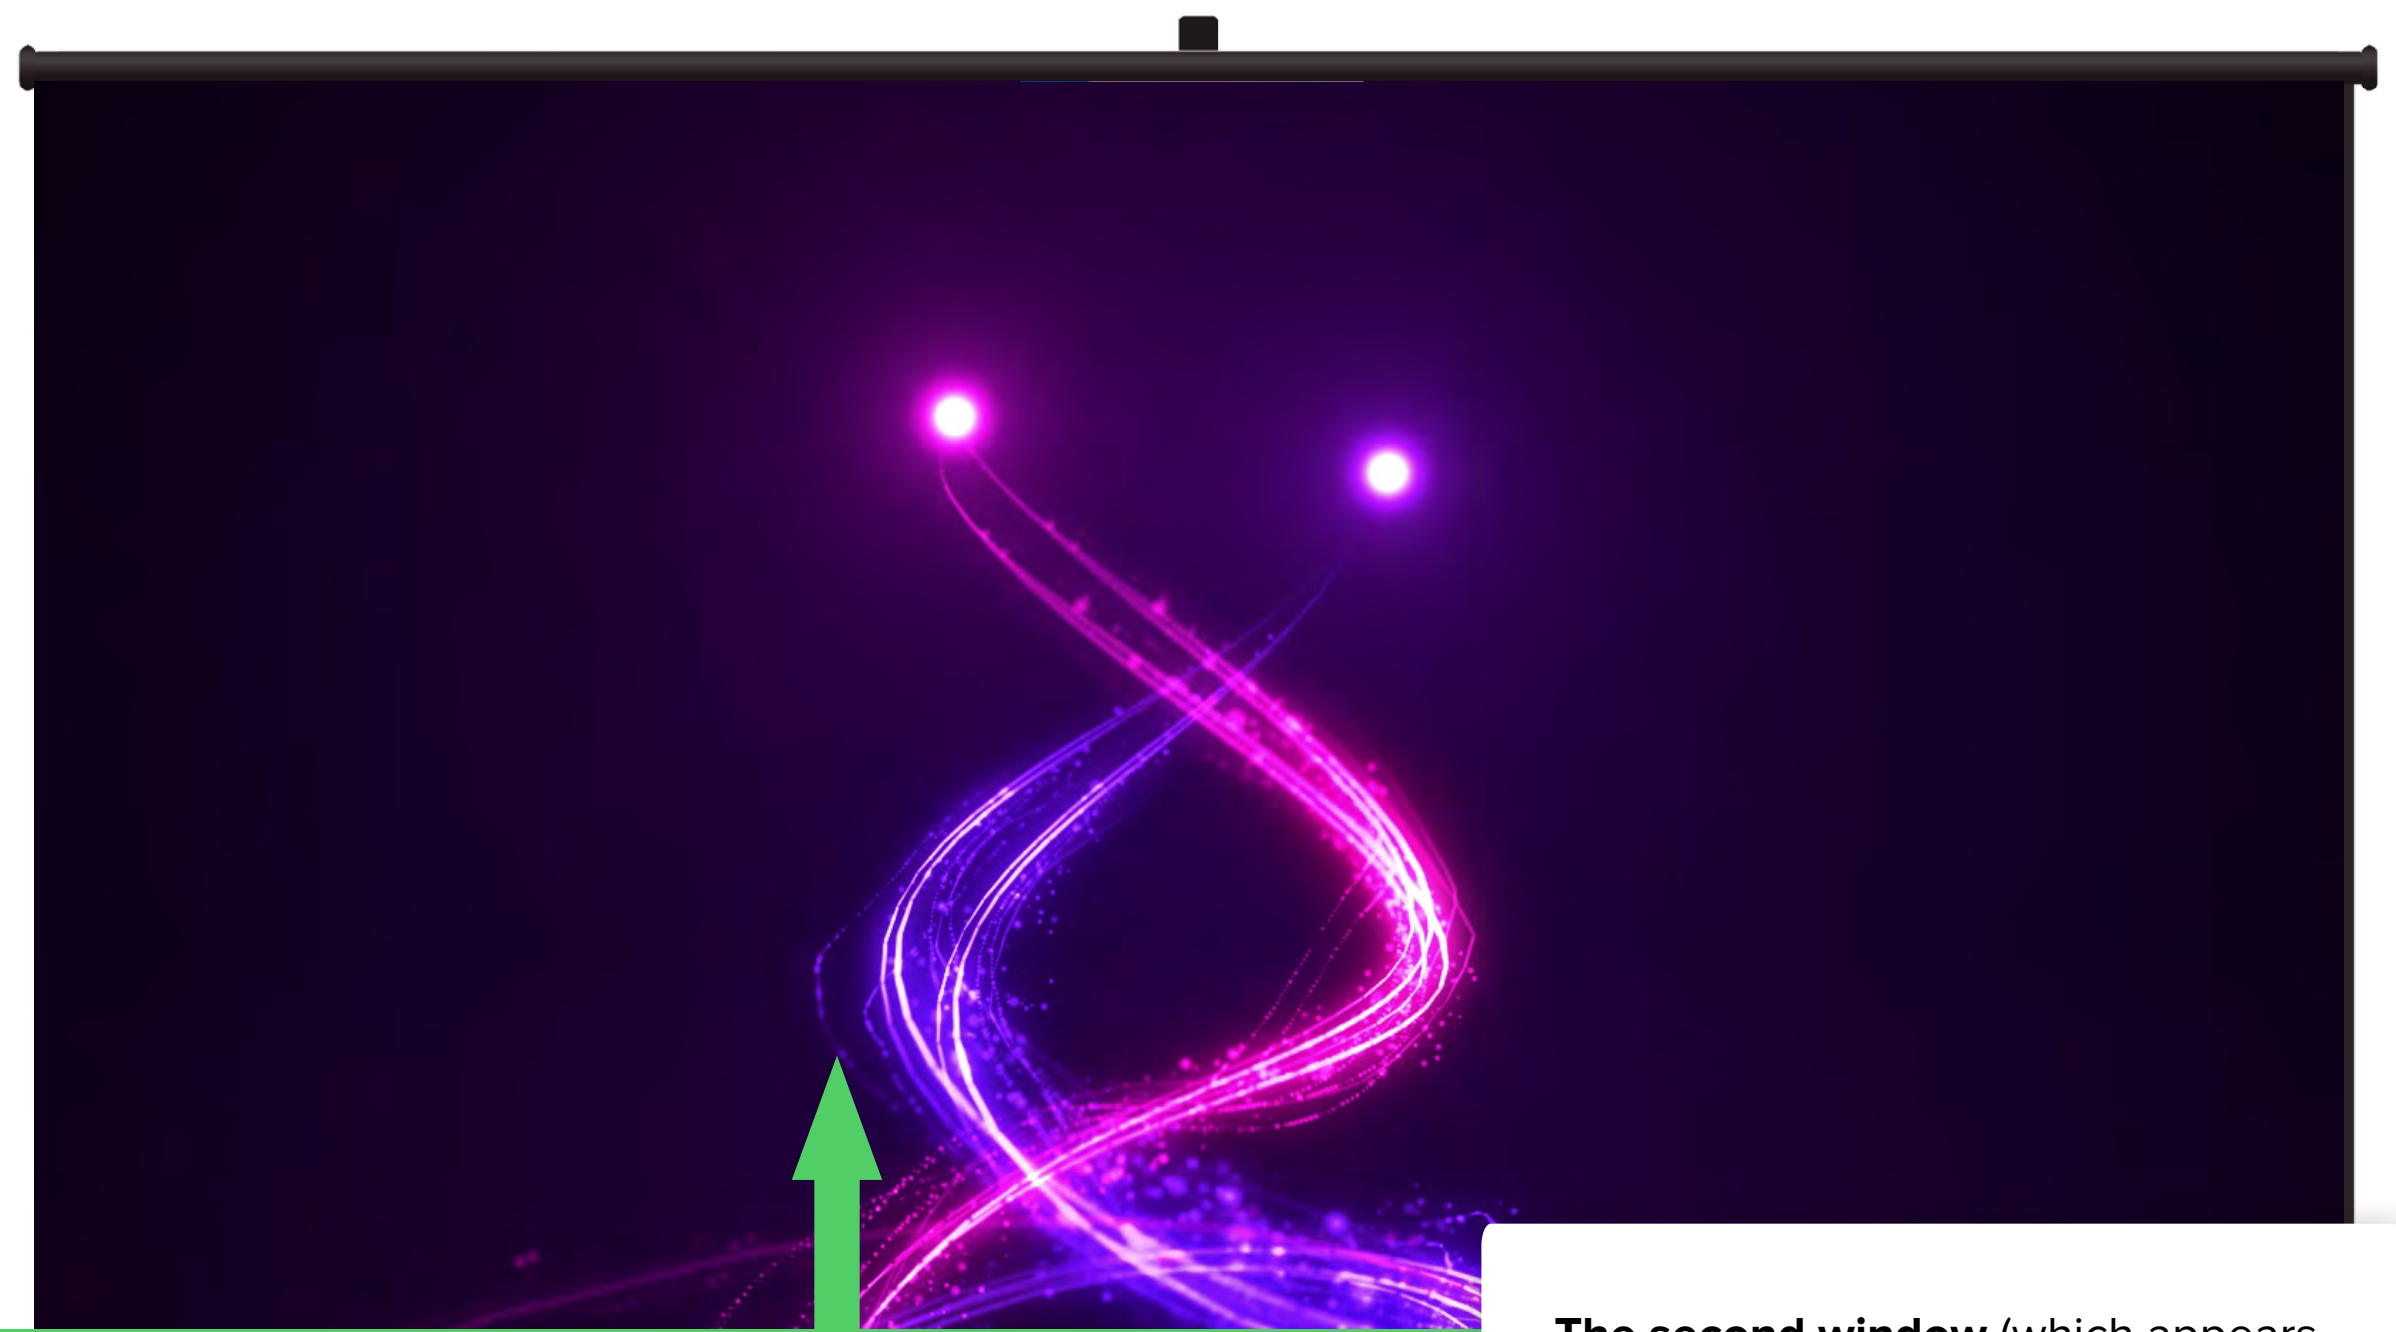

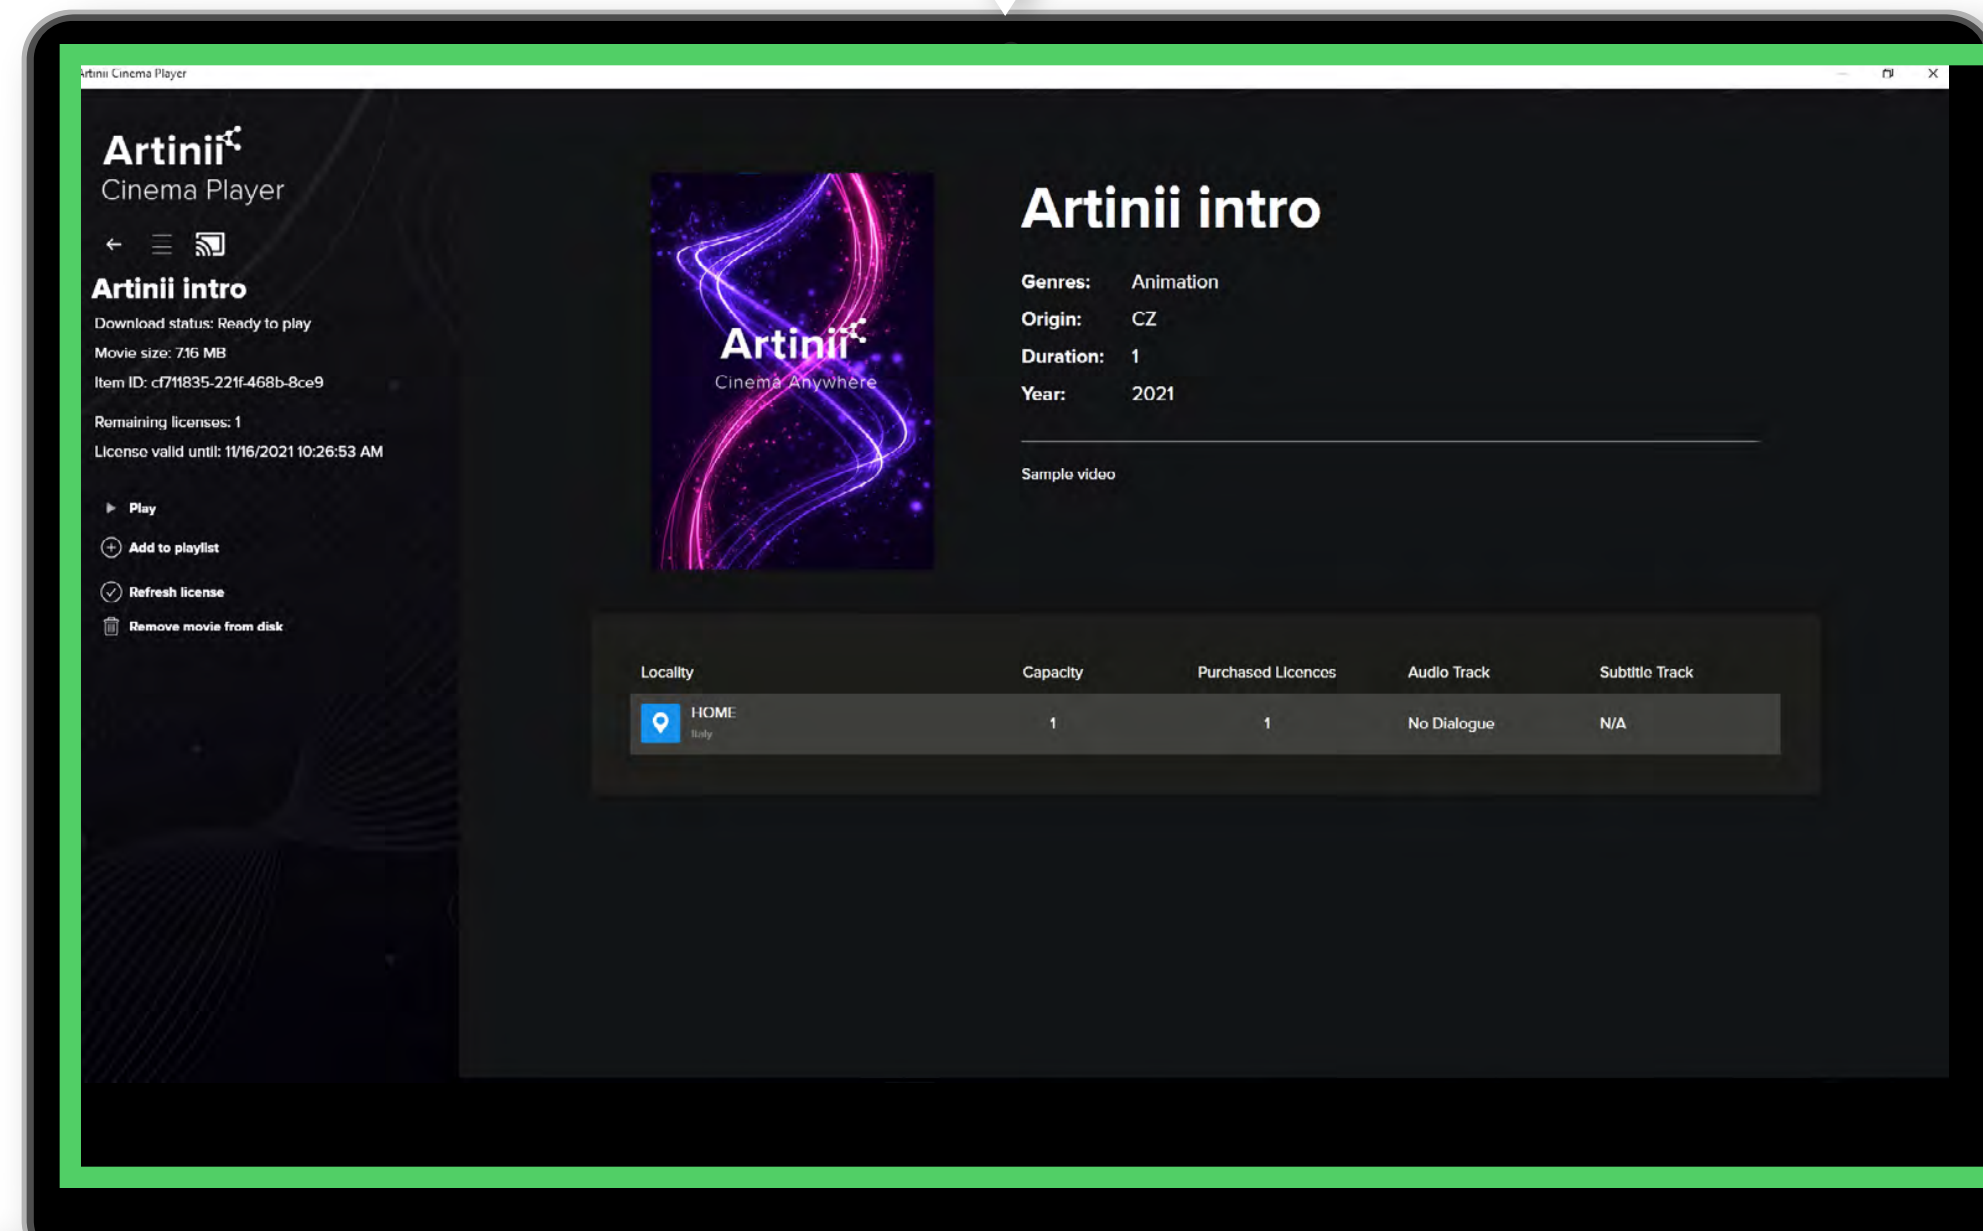

If problems occur during playback (e.g. power failure) and there are no licenses left for playback, an emergency license can be requested to complete the screening. Simply click on **Request emergency license**, write the reason for the request and it will be granted immediately. This function can be used even without an internet connection.

HOW TO SCREEN CORRECTLY

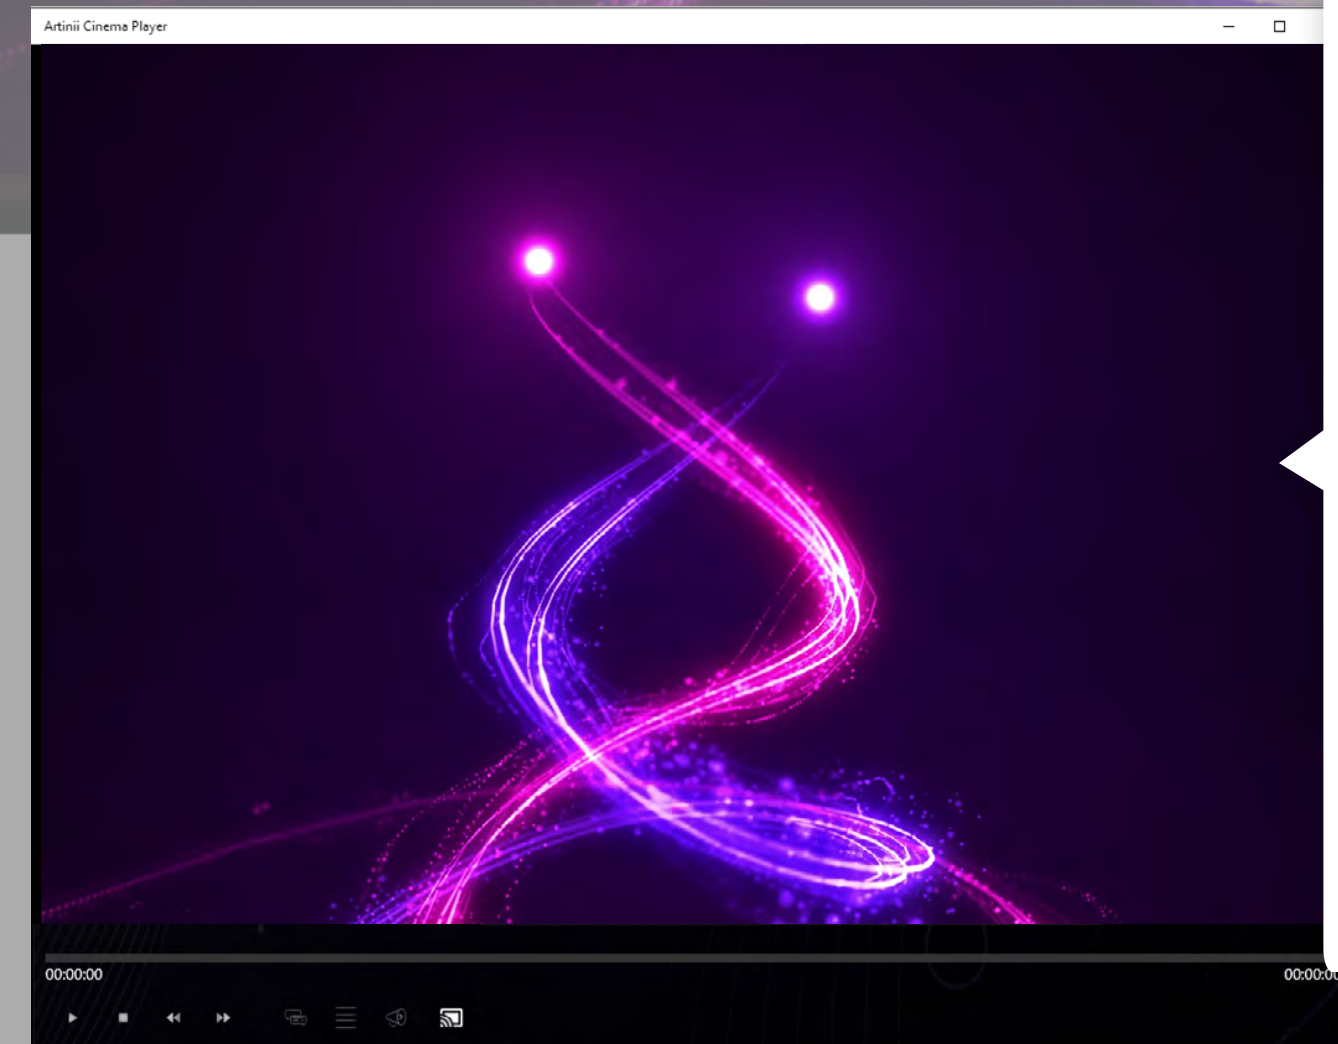

Leave the library window on your computer desktop. This is the environment where you can control the playback of the film.

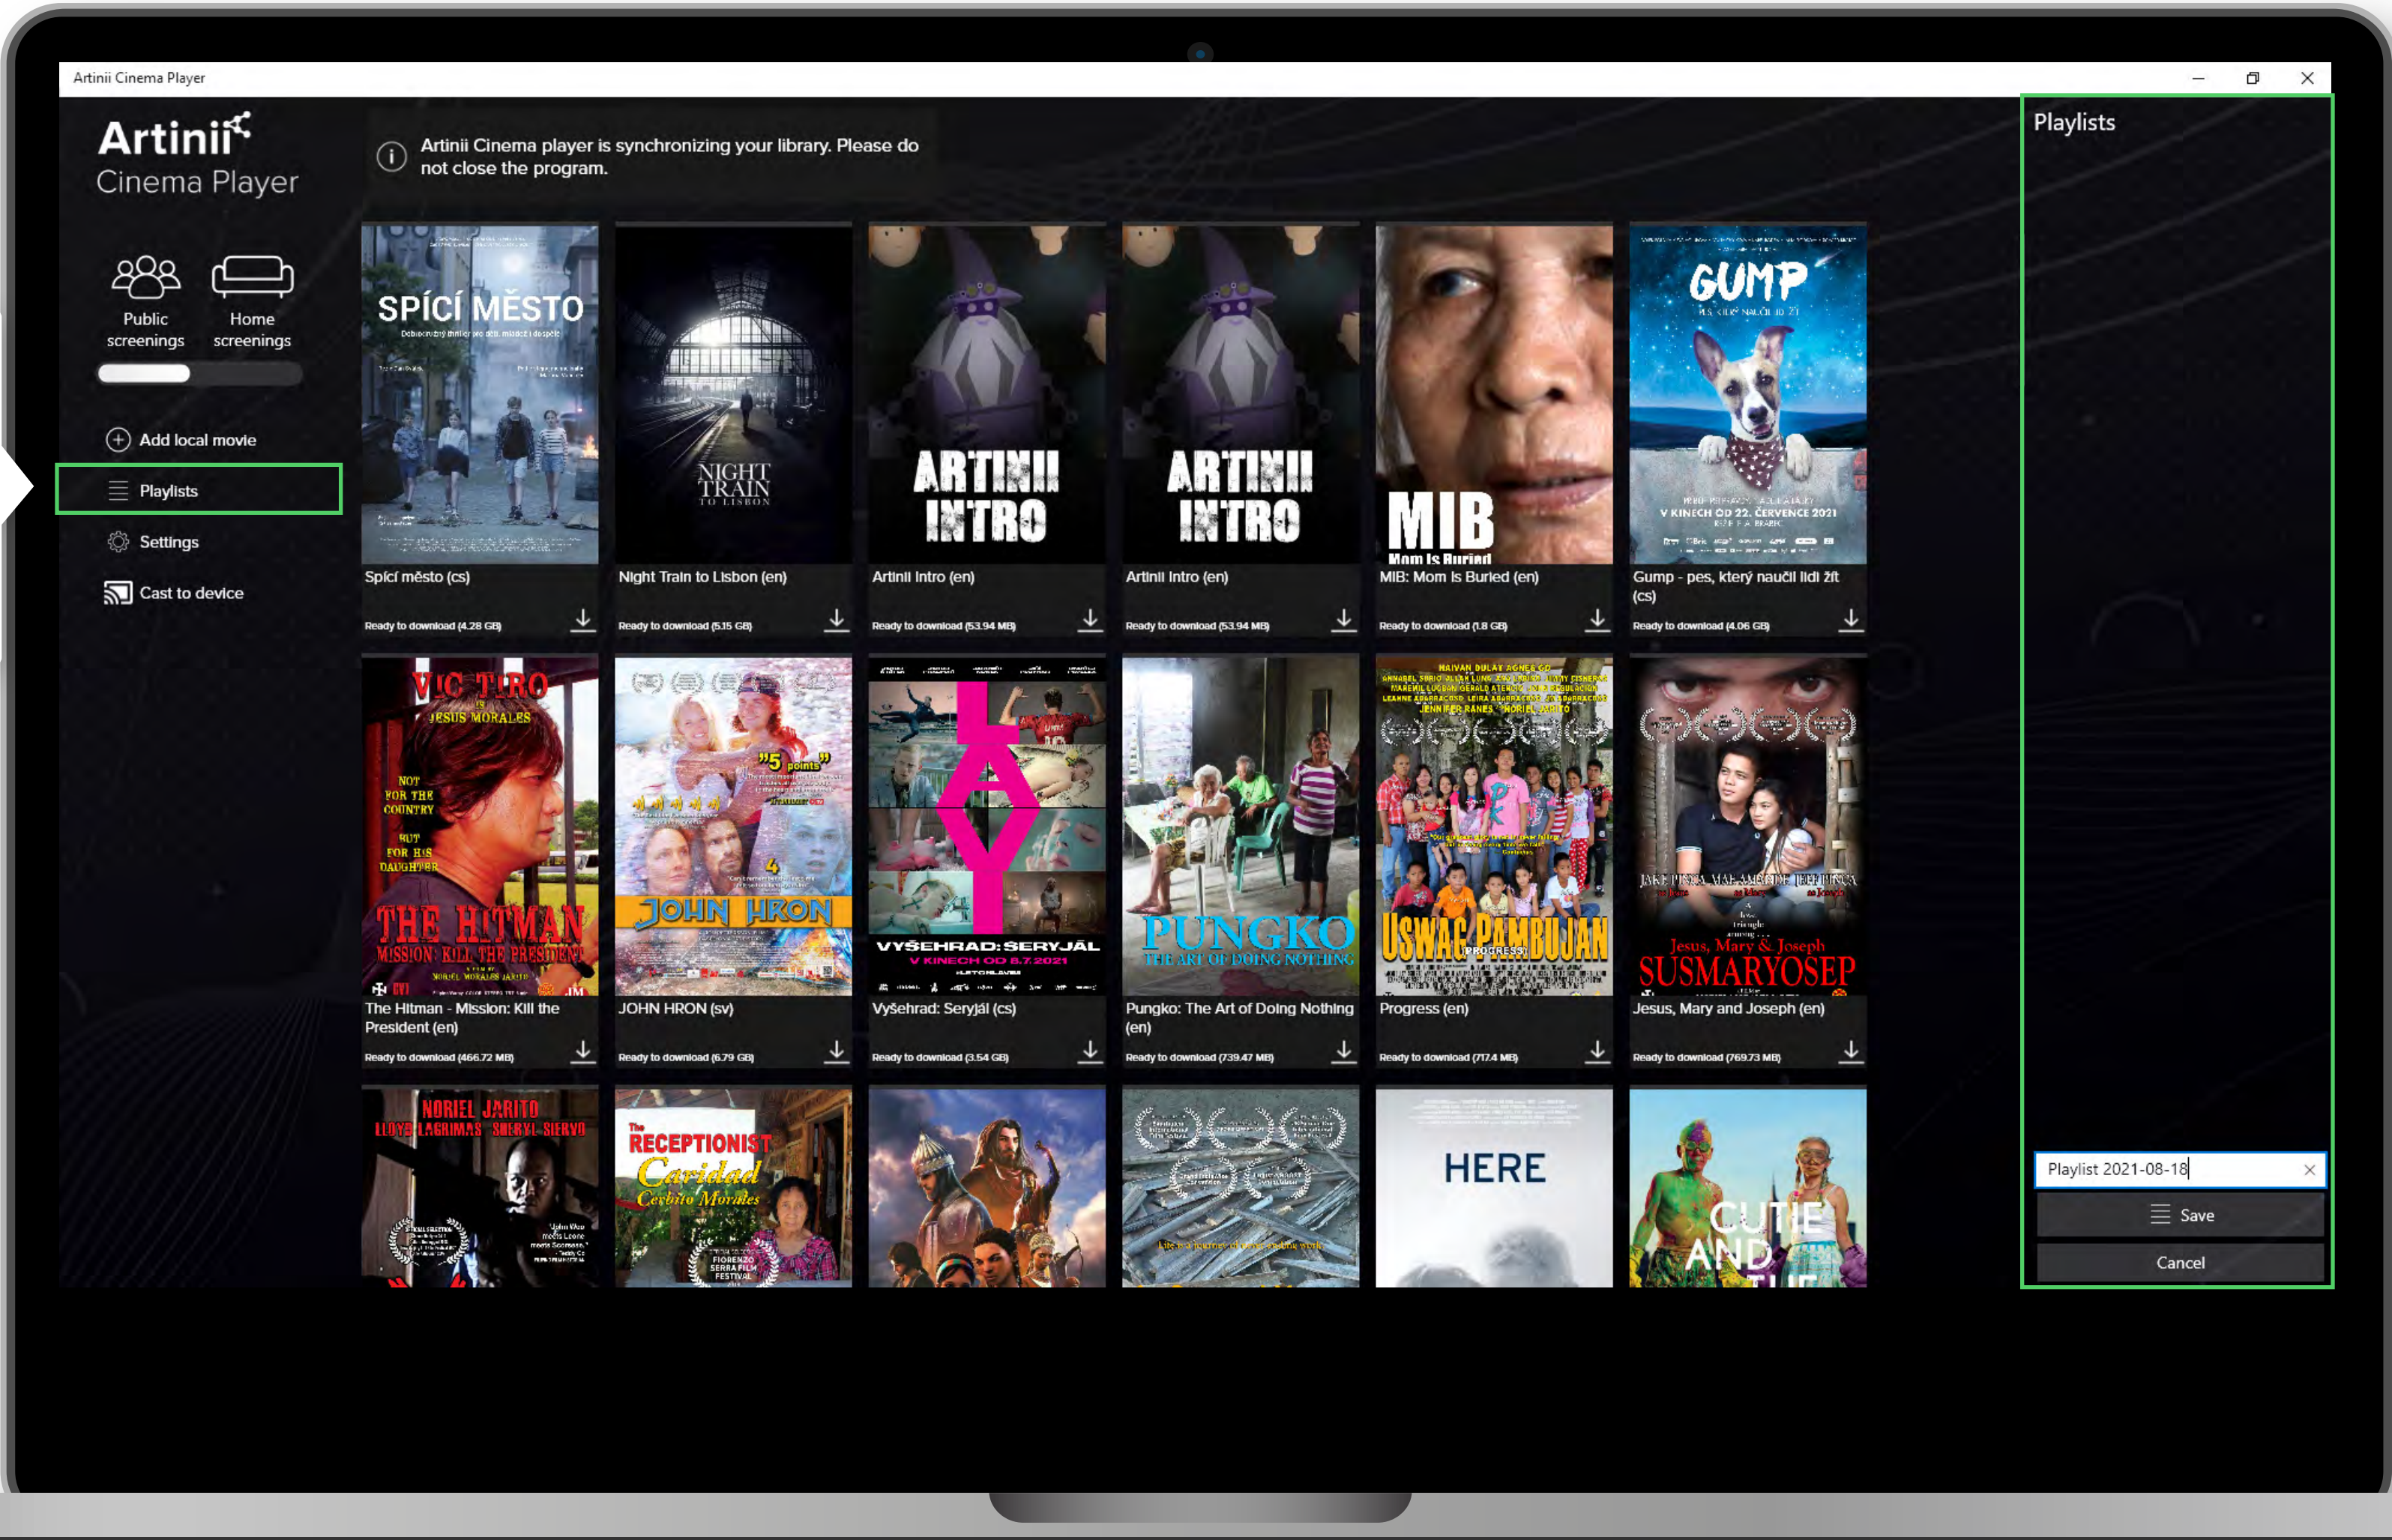

The second window (which appears when you start the film or playlist) is for the audience. Drag it with your mouse to right side of the screen, where the window will then be displayed. Use the **Expand Screen function** for a quality film experience.

How to expand the screen?

Use this way: Start -> Settings -> System -> Display -> Multiple displays in the drop down list, select expand desktop. [Find out more.](#)

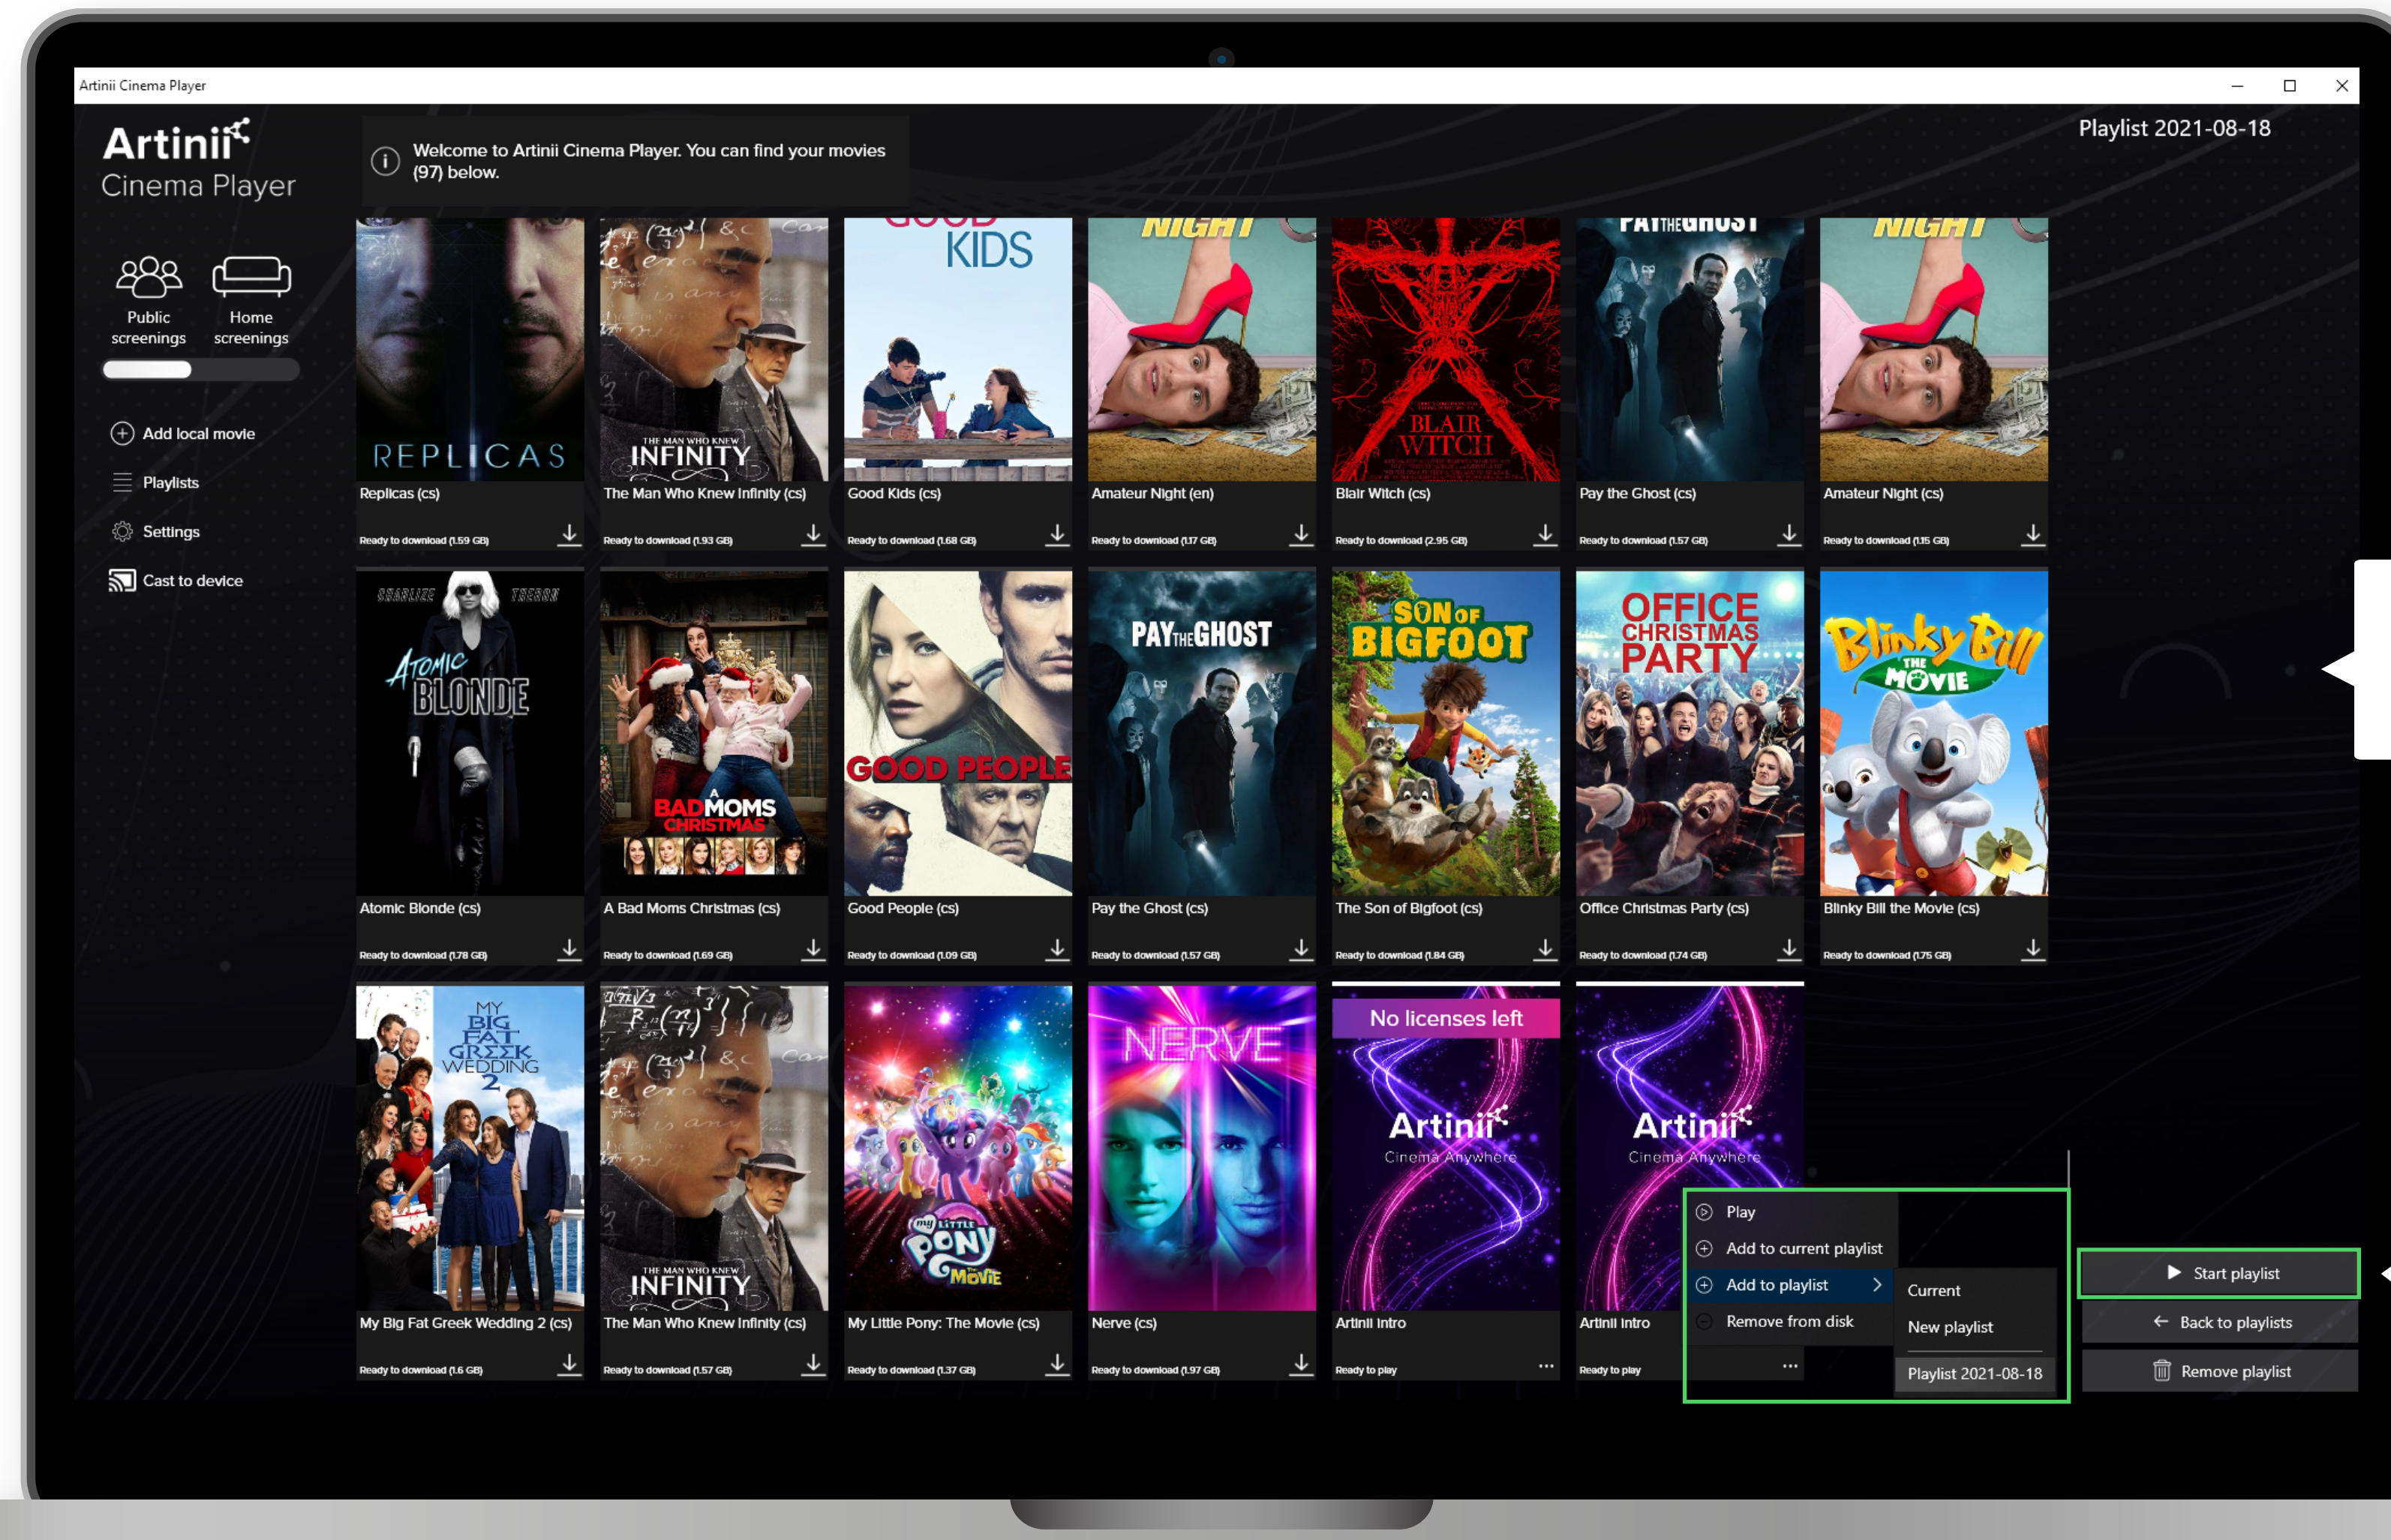

If you need to play another video before or after the film, use the **Playlists** feature. With the playlist function, you can prepare all the videos and the film you need for the screening.

PLAYLISTS

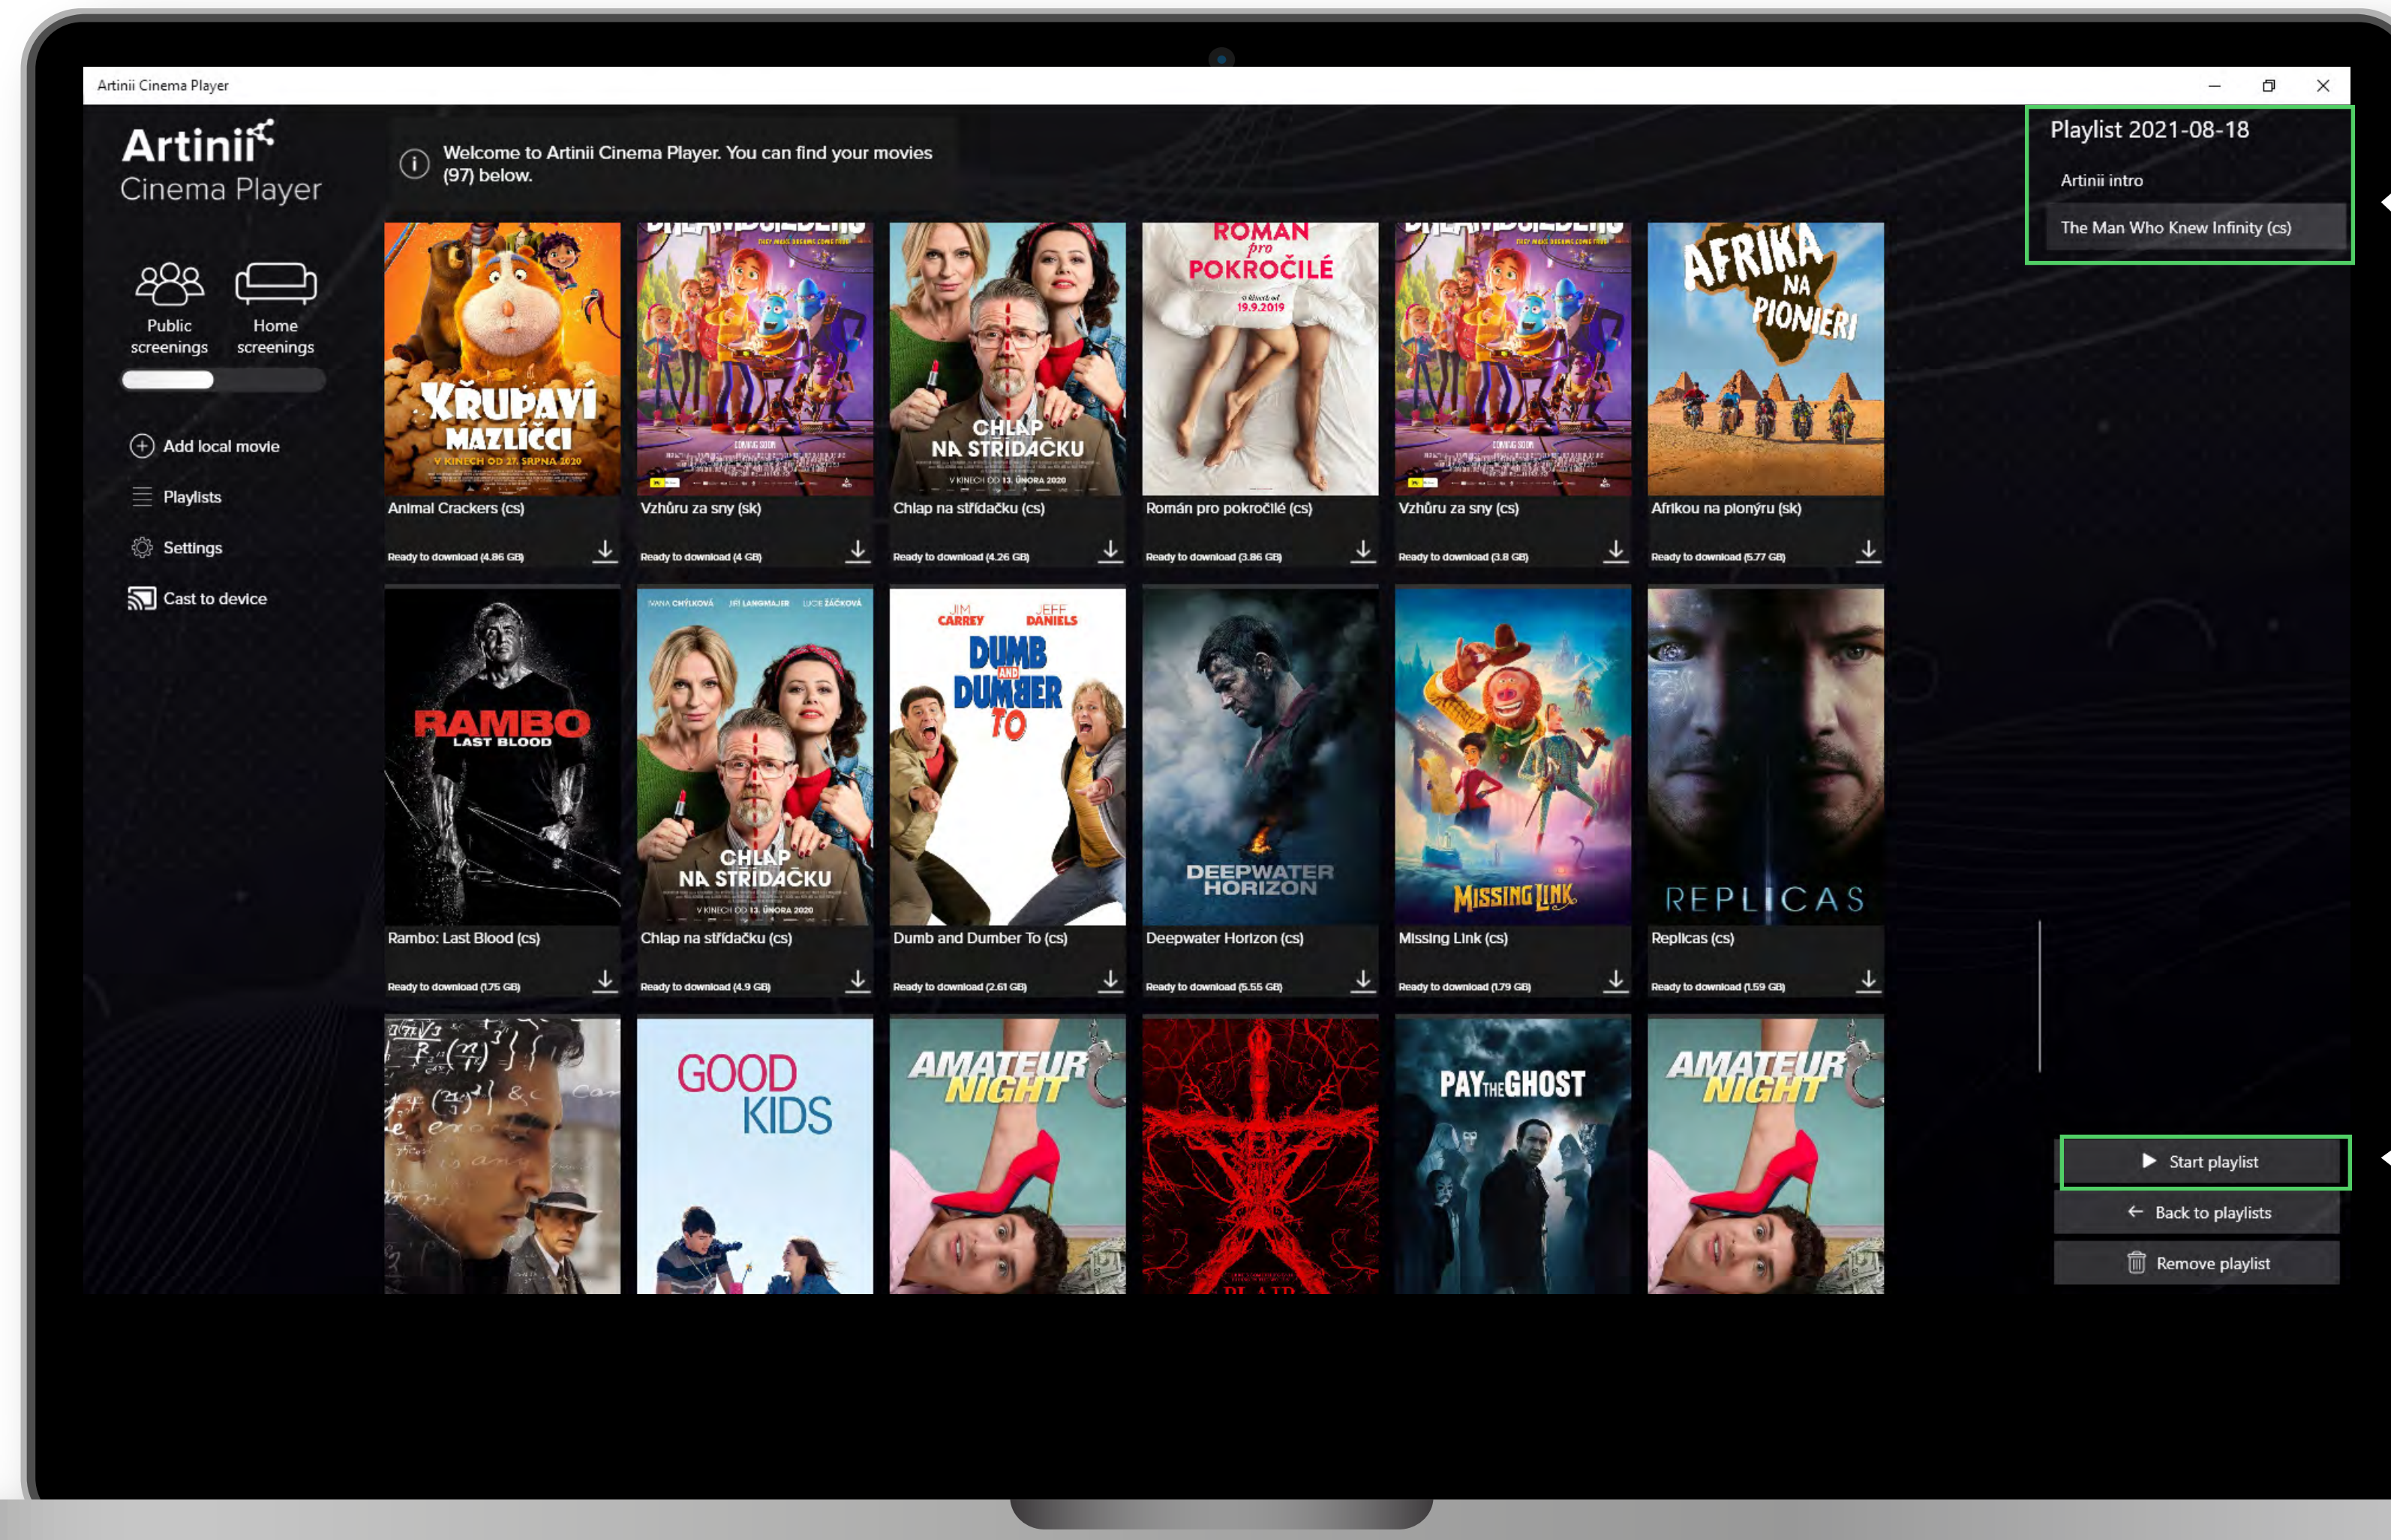

PLAYLISTS

You can add Artinii films as well as files from your local drive to the playlist.

To start a screening using the playlist, click on **Start playlist**.

PLAYLISTS

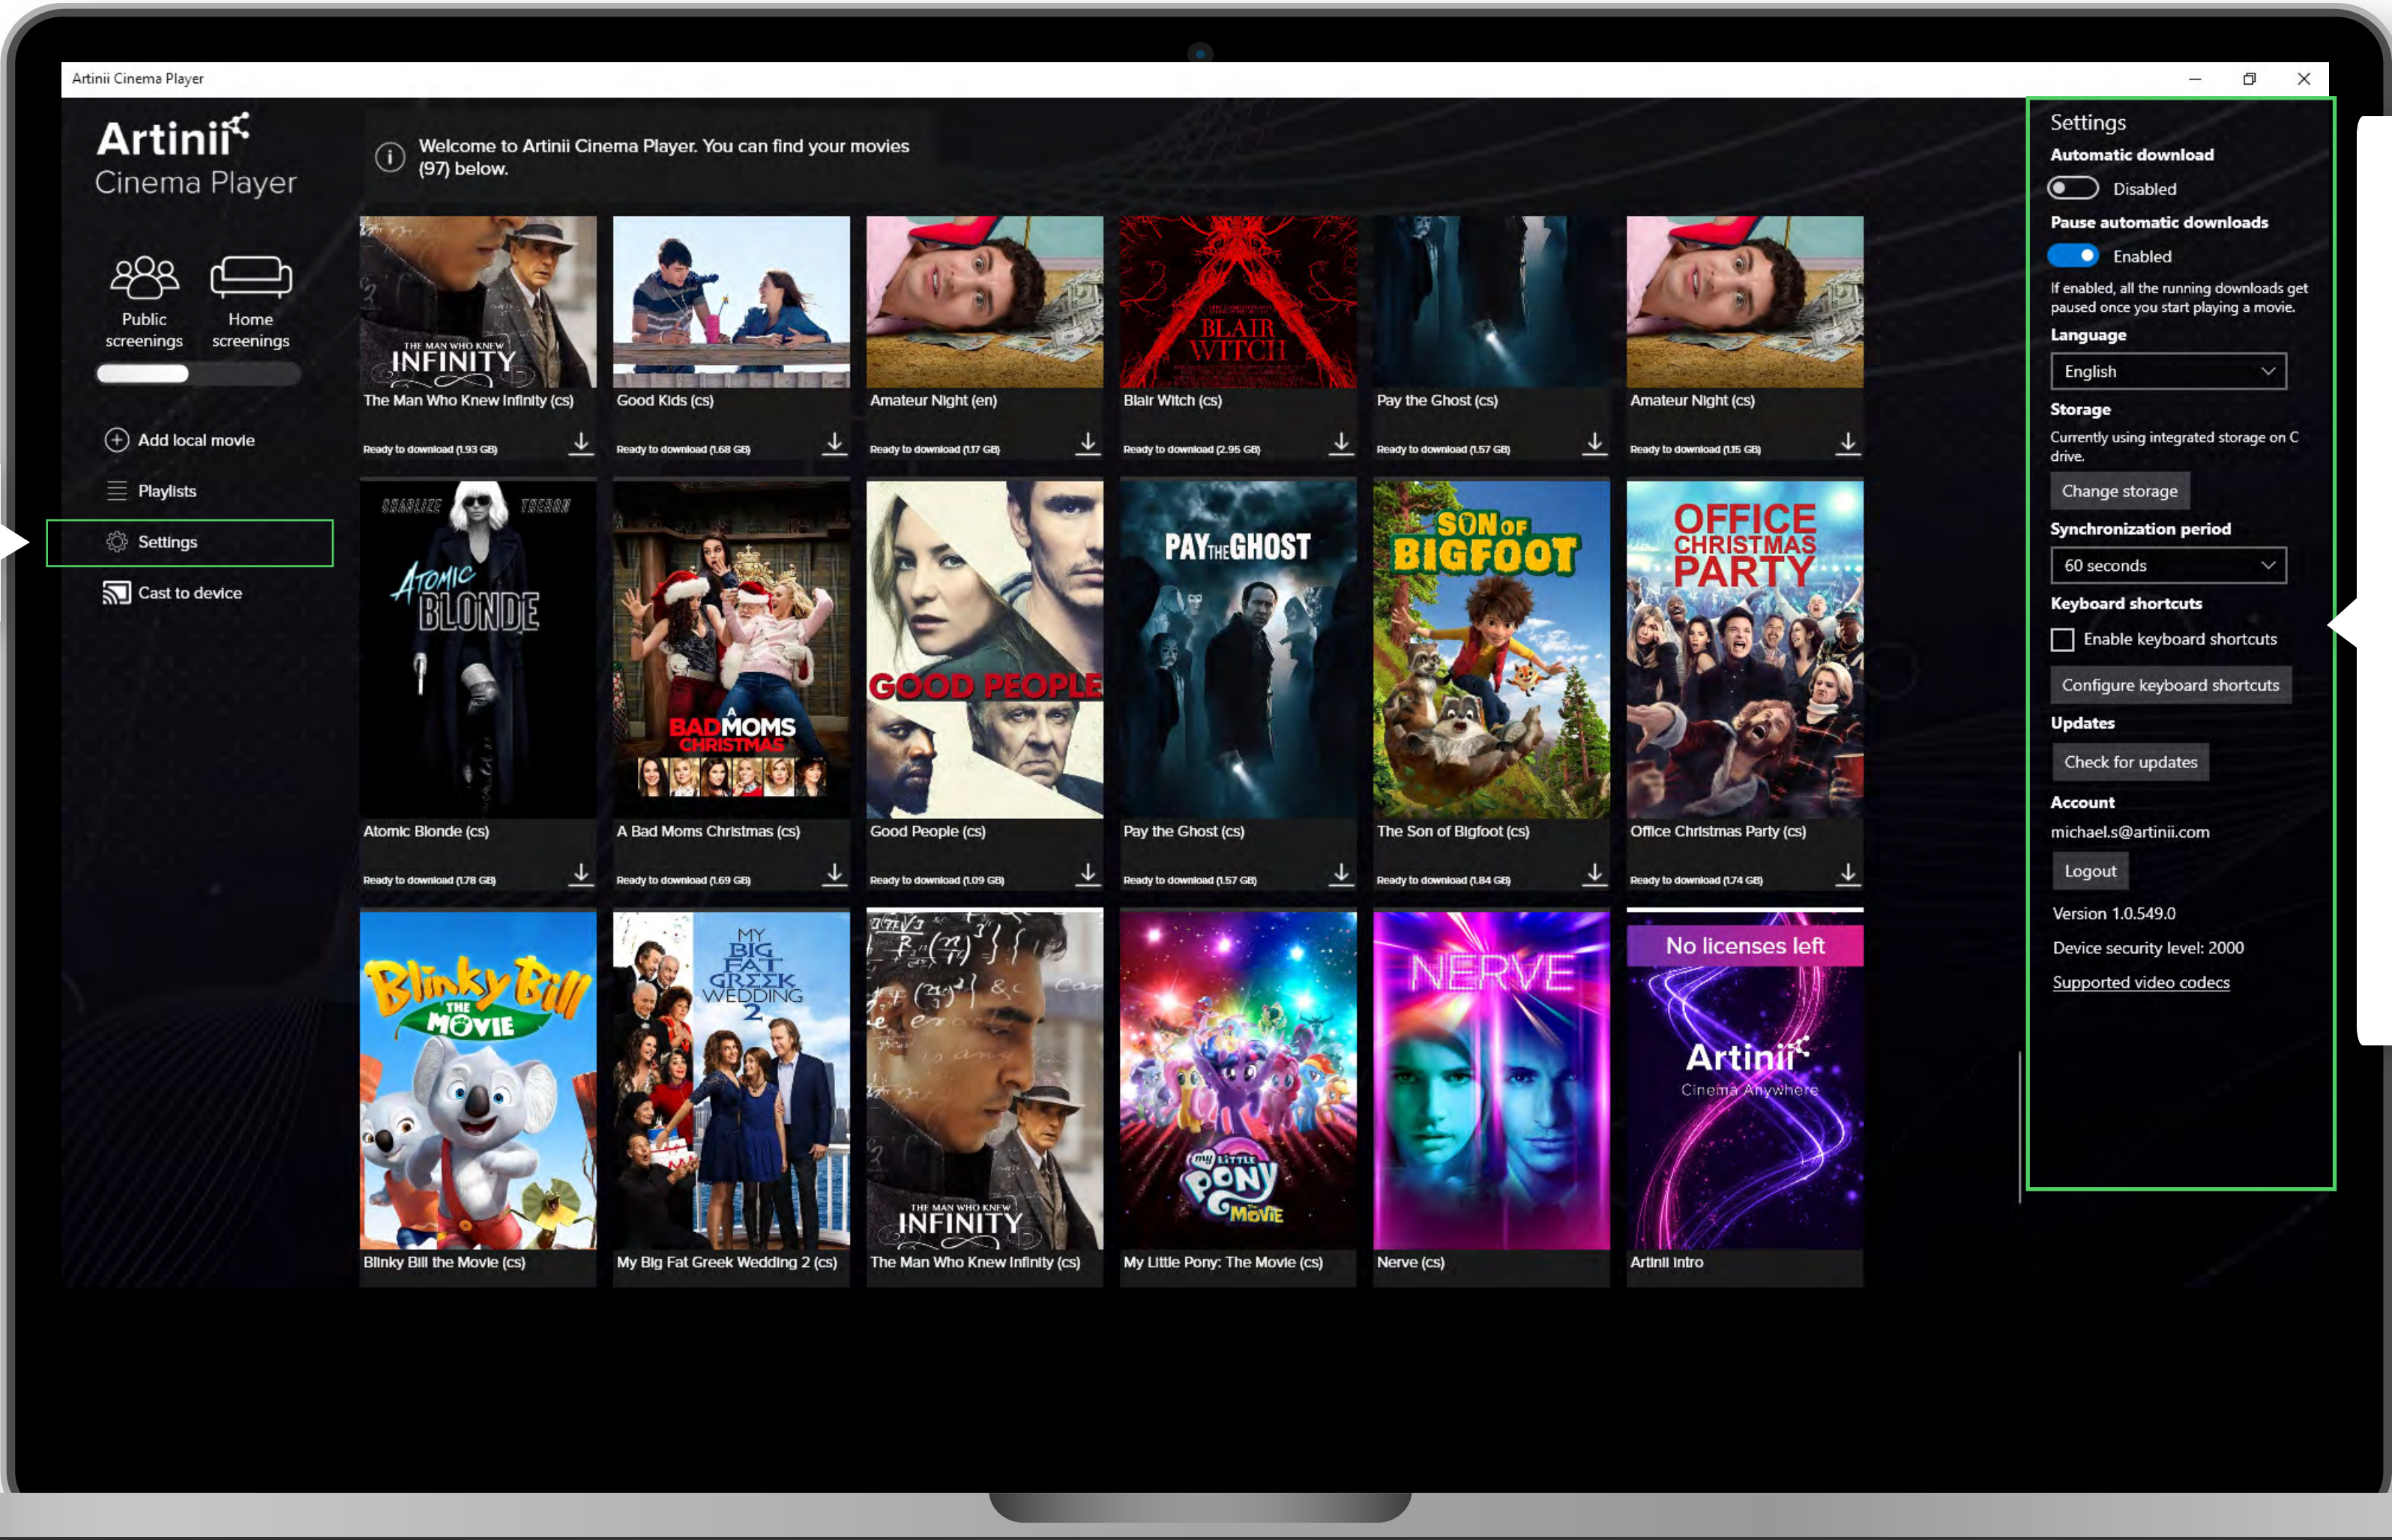

The ability to change the order (by dragging the file up or down) will ensure that you can screen in the sequence you want.

To start screening using the playlist, click on **Start playlist**.

SETTINGS

Click on **Settings** to view and set the player features.
